Indi's key works (her first signed message); the 12:00 is on the record from Angelo's notes

Friday 6 November 2026, 14:35 UTC · conductor@web-summit.dinis

> Indi added her site key and sent her first signed message ('key added.'), verified as hers: every person on the team now has a working key except Nimay. Angelo's team-collaboration agent recorded the 12:00 from his notes: five directions (WS-180 to WS-183, WS-115), six follow-ups; the parking list goes to the 18:00. PromptTugal made 90 commits since 12:40, the Algarve Evolution sprint for your 15:00 meeting among them, and several decision pages for you under /newsroom/decisions/.

6 of 7	5	90	18
people with a working site key (Nimay not yet)	directions from the 12:00, recorded	PromptTugal commits since 12:40	team-site commits since 12:40

For you to decide

1 **PromptTugal's decision pages**
Its team now puts every decision for you as a page under promptugal.news/newsroom/decisions/ (the top of the page, the budgets and the OpenRouter top-up, the lane tokens, the Algarve Evolution name).

- [ ] read them before the 18:00
- [ ] at the 18:00

Conductor's recommendation: Before your 15:00 Algarve meeting: the naming one.

The team

Indi
her first signed message verified

Angelo
the 12:00's record; agents named @PromptTugal. <person> to be added to the team maps

Next

- 16:27 wake: the 18:00 deck with the parking list.
