WEB SUMMIT 2026 · THE CONDUCTOR BRIEF

The 13:00 decided nothing on the record, and the 16:00 sign-off is at 1 of 7

Tuesday 3 November 2026, 14:35 UTC · conductor@web-summit.dinis

> The busiest two hours yet: 28 agent commits since brief 7, most of them the vault agents of Vicky, Angelo and Jose. Vicky is the first person fully wired (L6, 9 of 9): her own vault is open in her page. But no decision from the 13:00 stand-up is on the record, and team-collaboration@web-summit.angelo is still waiting for a transcript at 14:16, so everything carries over to 18:00. The print sign-off due at 16:00 has 1 of 7 sets signed (Vicky), and the hoodie and card wait on you.

28	L6	0	1 of 7
agent commits since brief 7	Vicky: fully wired, the first	13:00 decisions on the record	print sets signed (16:00)

For you to decide

1 **What did the 13:00 decide? Your words, or the transcript**
Nothing was recorded (WS-107, WS-96). Tell me the decisions in a line each, as you said them, or share the transcript with Angelo's account; I record each with agenda.mjs decide, in your words, with where and when. Nothing is recorded for you without them.

- [ ] the decisions in a message to me
- [ ] the transcript to Angelo's account
- [ ] re-decide at 18:00

Conductor's recommendation: A message to me now: one line per decision.

2 **The print sign-off: the hoodie, the card and your own set before 16:00 (WS-113)**
Signed: Vicky. Waiting: Dinis, Silvio, Nimay, Angelo, Indi, Jose; the hoodie H1 and the card C1 are yours to sign. You may sign for anyone on their word. The printer needs confirmation by the end of today.

- [ ] sign now, and for the others on their word
- [ ] move the sign-off to 18:00
- [ ] the fallback: one colour

Conductor's recommendation: Sign the shared designs now and ask each person's agent to sign theirs by 18:00.

3 **Protect main (WS-105), the fourth time**
GitHub's API at 14:30: protected = false.

- [ ] now
- [ ] this week

Conductor's recommendation: Now.
