WEB SUMMIT 2026 · INDI'S CONDUCTOR BRIEF

The newsroom: a reader-first patch is ready, and Dinis decides at 18:00

4 November 2026, 11:15 UTC (since brief 3, 07:25 UTC). Renumbered 5 at 12:25: the second conductor session's 11:05 brief is number 4. · conductor@web-summit.indi

> You passed on Dinis's call to make the Web Summit newsroom a full publication. I studied the three earlier newsrooms from their code, rewrote the new site in plain English with a newspaper look, and checked it on a phone. I cannot push to the newsroom's repository, so the work is a patch for Dinis to approve. It is on the 18:00 stand-up.

4	24 to 1	0	6
pages rewritten in short, plain sentences	sentences over 25 words, before and after (the 1 is a quote)	facts added; every source kept	publishing roles proposed

For you to decide

1 **Ask Dinis for push access to the newsroom repository**

Your GitHub account cannot push to SGit-AI__Website__Newsroom__Web-Summit. Without it, your agents can only send patches.

- [ ] ask at 18:00 (it is on the agenda)
- [ ] ask Dinis or Angelo now
- [ ] patches are fine for now

Conductor's recommendation: Ask at 18:00: it is part of the same decision.

2 **Allow the four newsroom sites in your Claude environment**

This session cannot load web-summit.newsroom.sgit.ai, newsroom.sgit.ai, pt.newsroom.sgit.ai or php.oct.2026.newsroom.sgit.ai, so I worked from their code. Same place as before: Network access, Allowed domains.

- [ ] allow all four
- [ ] not now

Conductor's recommendation: Allow all four, so your agents can check the live site after each change.

3 **Which newsroom roles your agents take**

The review proposes six roles. Your agents fit two: reporter (company profiles, building on dev's 28 factory pages) and reader's advocate (checking the site on a phone and the plain-English rules).

- [ ] reporter and reader's advocate
- [ ] one of them
- [ ] wait for Dinis

Conductor's recommendation: Offer both at 18:00, and let Dinis decide.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
4 Nov, about 11:00 UTC	*“start to edit the https://web-summit.newsroom.sgit.ai/ site to make it better”*	A patch: newspaper look, short navigation, every page in plain English, checked on a phone. A review of the three earlier newsrooms with six proposed roles. people/indi/newsroom/, board/WS-141	WAITING
4 Nov, about 08:35 UTC	*“yes (a QR code for your key)”*	Sent in chat, then my copy deleted. The temporary permission rule is now removed too. this chat	DONE

1. What each earlier newsroom teaches

- newsroom.sgit.ai: a fixed article shape and a house style the build enforces. But headlines of 30 to 50 words and a menu of about 70 links.
- pt.newsroom.sgit.ai: the best look (two faces, paper and ink, a masthead). Unfinished, with 6 articles from one day.
- php.oct.2026.newsroom.sgit.ai: clear agent cards and sourced claims. But about 20 roles and 1,099 pages, and it covered PHP security flaws, not a conference.

Next

- 18:00 stand-up: Dinis on the patch, your push access and the roles.
- Your key: send me one message from the Feedback pane for WS-136 (due 18:00).
- Tell me 'acknowledge' when you have read briefs 1 to 4.

Where this came from

The newsroom repositories' source on GitHub, read 4 November 2026 (the live sites are refused by this session's network policy) · The newsroom's gate on the patched tree: OK, 6 pages · people/indi/newsroom/README.md, board/WS-141
