WEB SUMMIT 2026 · INDI'S CONDUCTOR BRIEF

Midday: two conductors, one choice; your key by 18:00; the newsroom waits on Dinis

4 November 2026, 12:25 UTC (scheduled wake; since brief 5, 11:15 UTC) · conductor@web-summit.indi (the first session)

> Two sessions now run as your conductor. The second one wrote brief 4 at 11:05 and asks you to pick one; my 11:15 brief is renumbered 5. Your site key is still not added (WS-136, due 18:00). The newsroom patch and your push-access request wait on Dinis. Nothing is decided here.

2	3 of 7	5	18:00
conductor sessions running under one name	people with a site key added (WS-136); not yet you	agents of yours committing (conductor, dev, dashboard, designer, synthetic)	WS-136 due; the newsroom decision is on the same stand-up

For you to decide

1 **Which conductor session carries on**

This one (the first) holds your site key and the 07:20, 12:20 and 17:20 schedule. The second has its own key and no schedule. Both say they will change nothing of the other's.

- ☐ keep this first session
- ☐ keep the second session
- ☐ keep both, with different jobs

Conductor's recommendation: Keep this first session: it holds your key and the schedule. The second session's own brief recommends the same.

2 **Add your site key and send one signed message (WS-136, due 18:00)**

Open the link or the QR I sent you this morning. Then send one message from the Feedback pane. There is no lane for me yet, so it goes to conductor@web-summit.dinis, which is how Vicky's arrived and was verified.

- ☐ now
- ☐ before 18:00

Conductor's recommendation: Now: two minutes, and it is the only step left for WS-136.

3 **Start the journalist desk now, or wait for Dinis at 18:00**

Brief 10 of the newsroom's pack says your conductor starts your desks when you say go. The journalist desk would write three company profiles by 13:00 tomorrow, in people/indi/newsroom/.

- ☐ start now
- ☐ wait for 18:00

Conductor's recommendation: Wait for 18:00: brief 4 of the pack says the split between you and Vicky is Dinis's to decide.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
4 Nov, about 11:20 UTC	*“1. now. 2. done 3 yes”*	Push access asked on WS-141 (For: Dinis and Angelo's conductor), with a draft for you to send. The four newsroom sites load. Your agents offered for the newsroom roles. The patch rebased onto v0.1.2. board/WS-141, commit 233a5c6	WAITING

1. What happened since brief 5

- conductor@web-summit.dinis published the newsroom's brief pack. Brief 10 is a handover to me and Vicky's conductor, and it builds your patch in as step 1 (6b3a250).
- designer@web-summit.indi made round 2 of the business cards and a /cards/ page for phones (d40ace1, 8e6e9f8, efe8e8e). It is now listed in agents.json.
- synthetic@web-summit.indi tested the cards with synthetic users, run 1 (a88e8c6, WS-142).
- abp@web-summit.dinis wrote policies for your designer and synthetic agents, and recorded your two conductors (24ccdce).

2. From your mentor (11:41)

- Choose one conductor session first, so your agents do not double up. Then add your key and send one signed message.

Next

- 13:00 stand-up: the card designer agent, the printer date (Vicky's logistics agent).
- 18:00 stand-up: the newsroom patch, your push access, the roles; WS-136 due.
- 17:20: my next wake.
- Tell me 'acknowledge' when you have read briefs 1 to 6.
