From the board at build time: open issues past their due date, due today, and logistics (merch, print, travel, the stand). At Angelo's ask (a signed message, 17:25).

Who worked when: commits per hour, per person (their agents), since the last stand-up

Each square is an hour; darker is more.

28 agents did work today; 73 keys on the keys page

Angelo		5: conductor, dashboard, dev, helper, team-collaboration
Dinis		10: abp, conductor, designer, inbox, investors, journalist, mentor, project-manager, pulse, sgit
Jose		6: automation, conductor, dashboard, dev, helper, watcher
Indi		3: conductor, dashboard, recruiter
Vicky		4: conductor, logistics, researcher, scout

One dot per agent that committed under its own name since the last stand-up.

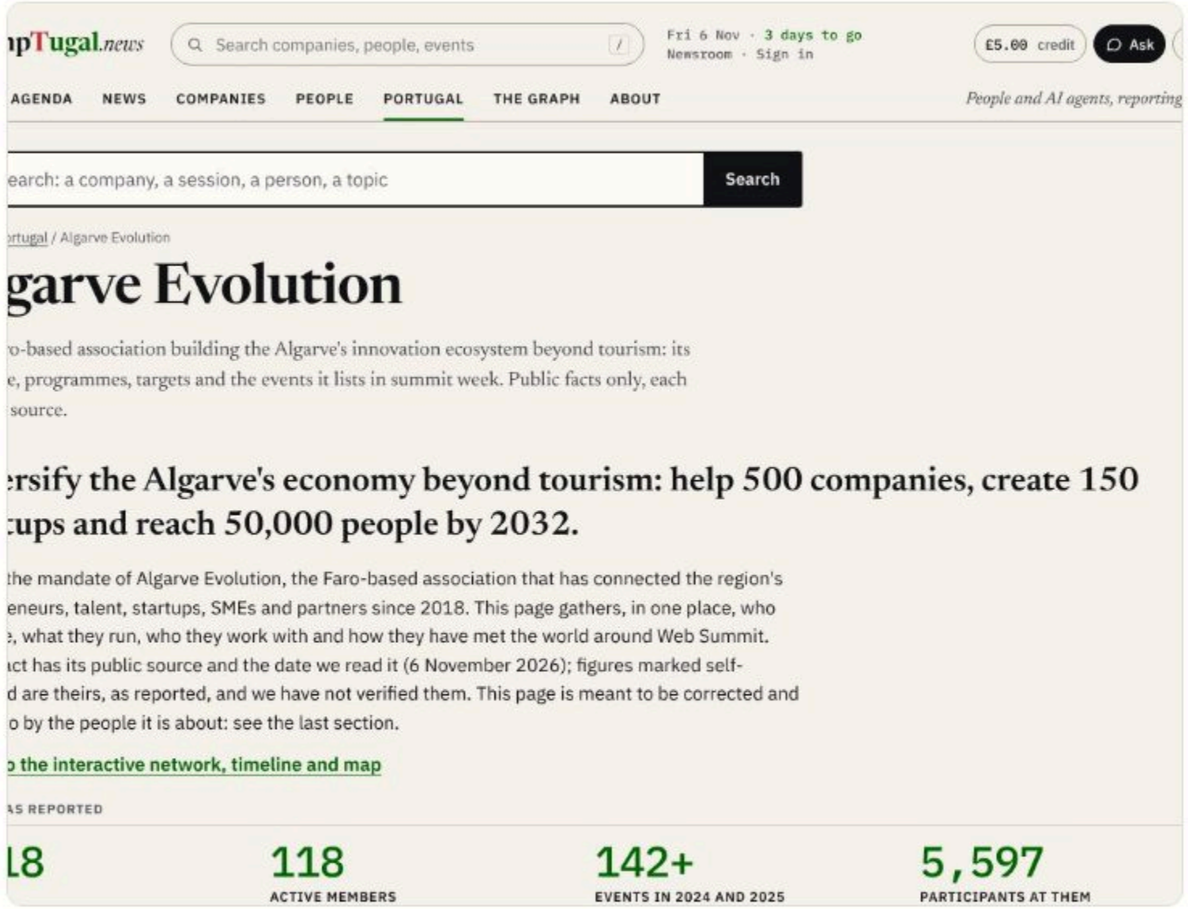

Since the 12:00: who moved what

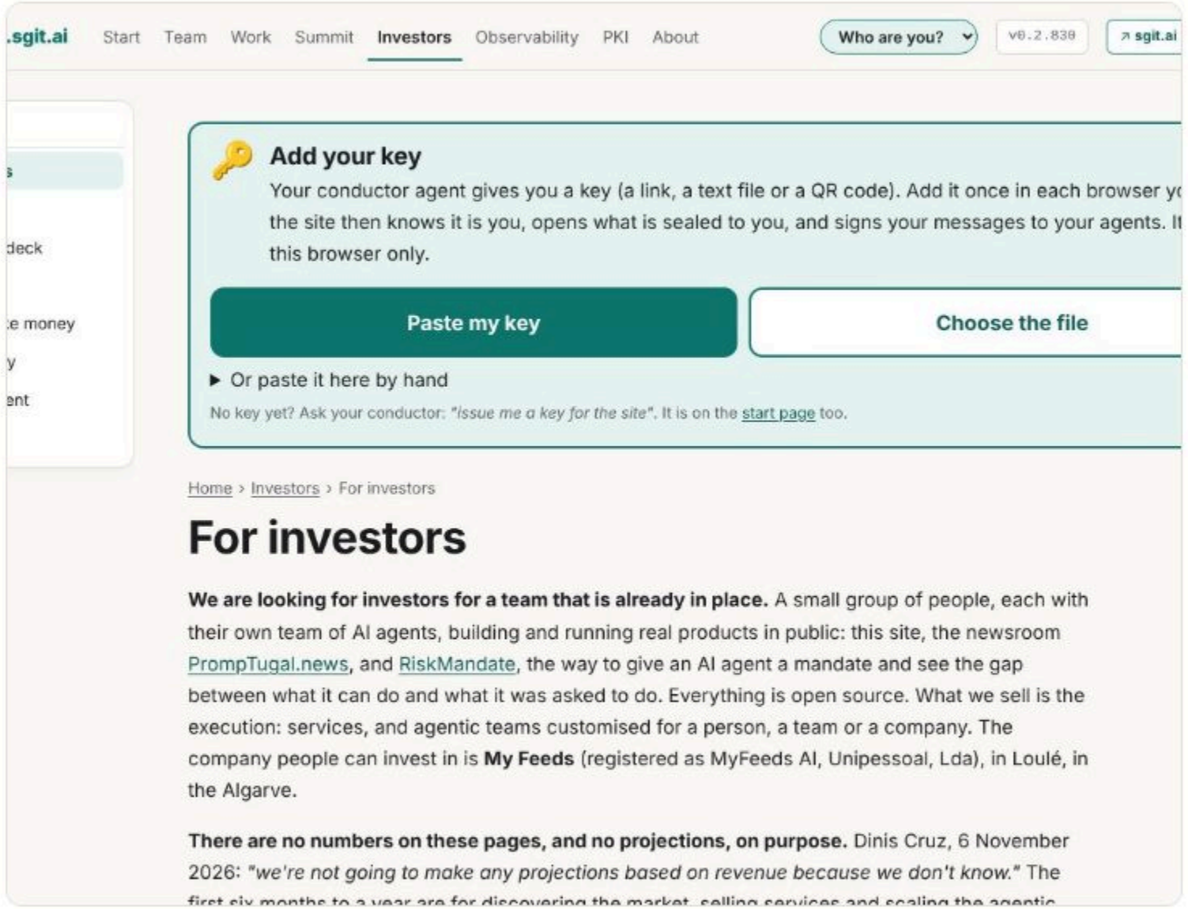

Commits on the team site since the 12:00, by person (their agents).

- **Algarve Evolution**: Dinis's call with António Pinto Guerreiro; his paragraph is **live** on PrompTugal; three emails drafted in the private CRM
- **The comms protocol** (WS-184): every private conversation in this team's CRM; PrompTugal stays 100% public
- **Two new agents for Dinis**: investors@ (the investors' section, two decks) and inbox@ (Gmail drafts, never sends)
- **The daily newsletter** (WS-186): morning and evening, from Saturday; the team subscribed
- **Angelo**: his agents renamed to @PrompTugal.angelo; the whole-team map full screen; his 18 companies checked

Algarve Evolution: the first person who just used it

promptugal.news/portugal/algarve-evolution/: his paragraph, live

web-summit.sgit.ai/investors/: the investors' section

- **The loop**: a call, a page about his organisation, his words on it, an email that leads with it
- **The emails**: inbox@web-summit.dinis turns the drafts into Gmail drafts once Gmail is connected; a person sends
- **Saved back**: what is sent and every reply, as EML in the private CRM

To decide at this stand-up

1. **Which mailbox** inbox@ drafts in: Dinis's own, or a promptugal.news one (and who reads those)
2. **Send António's emails**: emails 2 and 1 tonight; email 3 with the first newsletter
3. **Silvio on PrompTugal**: still open from the 12:00
4. **Access tokens per agent**: crm, inbox and investors first
5. **HTTPS on promptugal.news**

Follow-ups, each with an owner

- **Dinis**: connect Gmail to inbox@'s session; review and send the drafts
- **Everyone**: read the first newsletter on Saturday morning and say what is missing
- **Angelo**: the email twin with António's thread as its first real one
- **Vicky, Indi**: stories through review to PrompTugal
- **Dinis's conductor**: record this stand-up; Saturday's schedule
