WEB SUMMIT 2026 · INDI'S CONDUCTOR BRIEF

# You now have two conductor sessions: please choose one

4 November 2026, 11:05 UTC (since brief 3, 07:25 UTC) · conductor@web-summit.indi (the second session, started about 10:57 UTC)

> This brief comes from a new conductor session. Your first conductor session is still alive: it holds your site key and its scheduled task wakes it at 12:20. Two sessions with one name will step on each other, so I changed nothing of the first one's. I made my own key and published it beside the first one's, added one item for you to the 13:00 stand-up, and wrote this brief. Nothing is decided here.

| 2 | 12:20 | 4 of 7 | 18:00 |
|---|---|---|---|
| conductor sessions running as conductor@web-summit.indi | the first session's next scheduled wake | site keys added on WS-136 (1abe5d7, 10:43 UTC); yours not yet | WS-136 due: your key added and one signed message |

## For you to decide

1 **Which conductor session carries on?**

The first session (started 3 November, 22:57 UTC) issued your site key at 07:21 and sent you its link and a QR at 08:37; only it holds the private half. Its scheduled task fires into it at 07:20, 12:20 and 17:20. It is also waiting on your answer to its last question (the brand assets, and whether to make it part of WS-69). This session has none of that.

- ☐ keep the first session; this one stops after this brief
- ☐ move to this session: I move the schedule here, issue you a new site key and mark the old one replaced
- ☐ keep both, with different jobs (tell me which)

Conductor's recommendation: Keep the first session: it holds your site key and its schedule, and WS-136 is due at 18:00. If you choose it, I add a note to data/keys.json that this session's key is unused.

2 **Add your site key (WS-136, due 18:00)**

Still open for you on the board. Use the link or the QR the first session gave you in its chat (not in this brief: they carry your key), or press 'Paste my key' on any page. Then send one message from the Feedback pane. Vicky's went to conductor@web-summit.dinis's lane and verified (10:35 UTC); the pane has no lane yet for the person conductors.

- ☐ now, from the first session's link
- ☐ on the phone, from its QR
- ☐ later today, before 18:00

Conductor's recommendation: Now, from the link: two minutes, and it unblocks the vault step.

3 **A business-card designer agent (13:00 stand-up)**

Vicky's agent relayed at 10:05 UTC that Dinis asked you to start a designer agent for the business cards, with a few options to choose from (f6e35e5). Vicky's card content waits for it (people/vicky/business-card.json). I have not heard this from Dinis or you directly, so I put it on the 13:00 agenda for you and Dinis.

- [ ] start designer@web-summit.indi today; it owns the cards
- [ ] the cards stay with designer@web-summit.dinis; yours drafts options only
- [ ] Thursday, in person

Conductor's recommendation: Ask Dinis at 13:00 what it owns, then start it today. I can draft its prompt as soon as you say go.

## What you asked, and what was done

| WHEN | YOU SAID | WHAT WAS DONE | |
|---|---|---|---|
| 4 Nov, about 10:57 UTC (this session's first message) | *"Make your own key (node pki-agent.mjs keygen --session ...) and commit only its public half as an entry in data/keys.json."* | Key made in this session (sha256:6af242af55ef7980, signing sha256:10ede272aaccf89e), linked to the operator's key; the public half added as a second entry, so the first session's key stays published<br>data/keys.json, entry conductor-indi-2 | DONE |
| 4 Nov, 10:16 UTC (in the first session) | *"Can you find the brand assets page (or similar) page somewhere in the repo and send me link to paste into the browser??"* | Answered in that session, not here. It found the design page and the print files page, and is waiting on your reply about WS-69.<br>the first session's chat; /design/ and /print/ on the site | WAITING |

## 1. What happened since brief 3

- WS-136: Angelo (about 10:15 UTC) and Vicky (about 10:20 UTC) added their site keys and saw Unlocked. Four of seven have now (mentor@web-summit.dinis, 1abe5d7).
- Vicky's signed message reached conductor@web-summit.dinis's lane and verified (10:35 UTC, recorded on WS-136). Angelo's and Vicky's conductors have no lane of their own in the Feedback pane yet.
- dev@web-summit.angelo fixed WS-140: Give feedback now opens the pane, with no second click (20c3a39).
- Vicky's card content for the new designs: "Vicky Wang", with "Project Manager" under it, addressed to your conductor (f6e35e5).
- No commit by your own agents since 07:21 UTC (brief 3's run).

## 2. From your mentor (08:41 UTC)

- Add your site key first, read the message that unlocks, then send one signed message from the Feedback pane.
- After that, the vaults step with a vault agent.
- If your agents keep running on their own, your mentor could hand over from 6 November.
- Worth adopting: all three. The first two are WS-136; the vault agent is your L6.

## Next

- Your answer to ask 1. Until then I change nothing of the first session's: its key, its schedule, your site key.
- 13:00 stand-up: the card designer agent (added by me), the first worked ABP (from abp@web-summit.dinis, for you and Nimay), WS-25's first five companies.
- Tell me or the first session 'acknowledge' when you have read briefs 1 to 4.
