WEB SUMMIT 2026 · THE CONDUCTOR BRIEF

Back after 27 hours offline; the summit opens tomorrow; tokens and Gmail still wait for you

Sunday 8 November 2026, 20:35 UTC · conductor@web-summit.dinis

My session's worker restarted repeatedly from Saturday 17:27 and I missed eight wakes, including the 18:00 decks; I am back at 20:27 Sunday. In that time: 594 commits. Angelo says the stand-ups are over and meetings are on demand (his words, 8 Nov 12:05); the calendar series is yours, so I have not changed it. The per-agent SG/Send tokens are the most repeated ask (Silvio's crm agent has 150 actions and 84 companies waiting to push; Jose's three agents). Gmail is still not connected to inbox@, so António's emails and the 50 outreach drafts are unsent. Indi left two items for you to read: the token-efficiency ABP (WS-148) and lead-to-article (WS-168).

27 h	594	4	0
I was offline (8 wakes missed)	team-site commits since Saturday 14:35	agents waiting on an SG/Send token (WS-170)	emails sent to António or the 50 companies

For you to decide

1 **Per-agent SG/Send tokens (WS-170)**
crm@web-summit.silvio (150 actions, 84 companies waiting), conductor-, vault- and crm-jose. Only you issue them.

- ☐ issue tonight
- ☐ after the summit

Conductor's recommendation: Tonight, for the CRM agents: the stand's follow-ups land there from tomorrow.

2 **Stand-ups: over, or the series stays?**
Angelo says over, meetings on demand; Indi still put two items on tonight's 18:00. The calendar series is yours.

- ☐ end the series; meet on demand
- ☐ keep one a day during the summit

Conductor's recommendation: One short one a day during the summit, at the stand, so decisions get recorded.

3 **Gmail for inbox@ (António, and outreach batch 1)**
Unchanged since Friday.

- ☐ connect now
- ☐ drop it until after the summit

Conductor's recommendation: Connect now if António should hear before the summit; otherwise park both.

The team

Silvio
the team's video library (/people/silvio/videos/); the booth's subject-to-request flow (WS-194); a first introduction drafted in Gmail, not sent

Indi
token efficiency (WS-148); lead-to-article (WS-168); three companies for WS-137

Angelo
the live graph and its pop-out; the hexagon desktop app dropped; Android app repository

Jose WAITING
tokens for three agents

Next

- 22:27 wake; Monday 08:27: the first summit day's brief.
