Overnight, while you slept

GAMMA-Ray Spectrum: the first cards

- **The first GAMMA-Ray cards:** Replit's agent signed off after two review rounds (A4 · R2 · C2 · O0); Manus, GetVocal AI (A4 · R2 · C1 · O1), AISLE and JetBrains Junie in review
- **The review works:** scores lowered wherever the sources did not support them
- **iOS CI:** 10 Mac jobs per push down to 1; about 40 minutes to TestFlight, straight from dev (devops.ios@)
- **pt.news:** the agentic edition on the front page; the two interviews lead; three Portuguese design directions (Azulejo, Calçada, Jornal)
- **Android:** chat made real, ABP case studies, the demo checklist for Wednesday

RISKMANDATE · WEB SUMMIT LISBON 2026 · THE TEAM

The 09:00 stand-up

Tuesday 10 November 2026 · 09:00 Lisbon · **-1 days** to opening night (Mon 9 Nov), our stand Thu 12 Nov

61
agent commits since the last stand-up

87
releases

19
agents at work since then

6 of 7
people with a site key

Built from the repository at 08:16 UTC. Nobody was asked what they did.

Open points first: urgent, late, logistics

From the board at build time: open issues past their due date, due today, and logistics (merch, print, travel, the stand). At Angelo's ask (a signed message, 17:25).

Who worked when: commits per hour, per person (their agents), since the last stand-up

Each square is an hour; darker is more.

19 agents did work today; 88 keys on the keys page

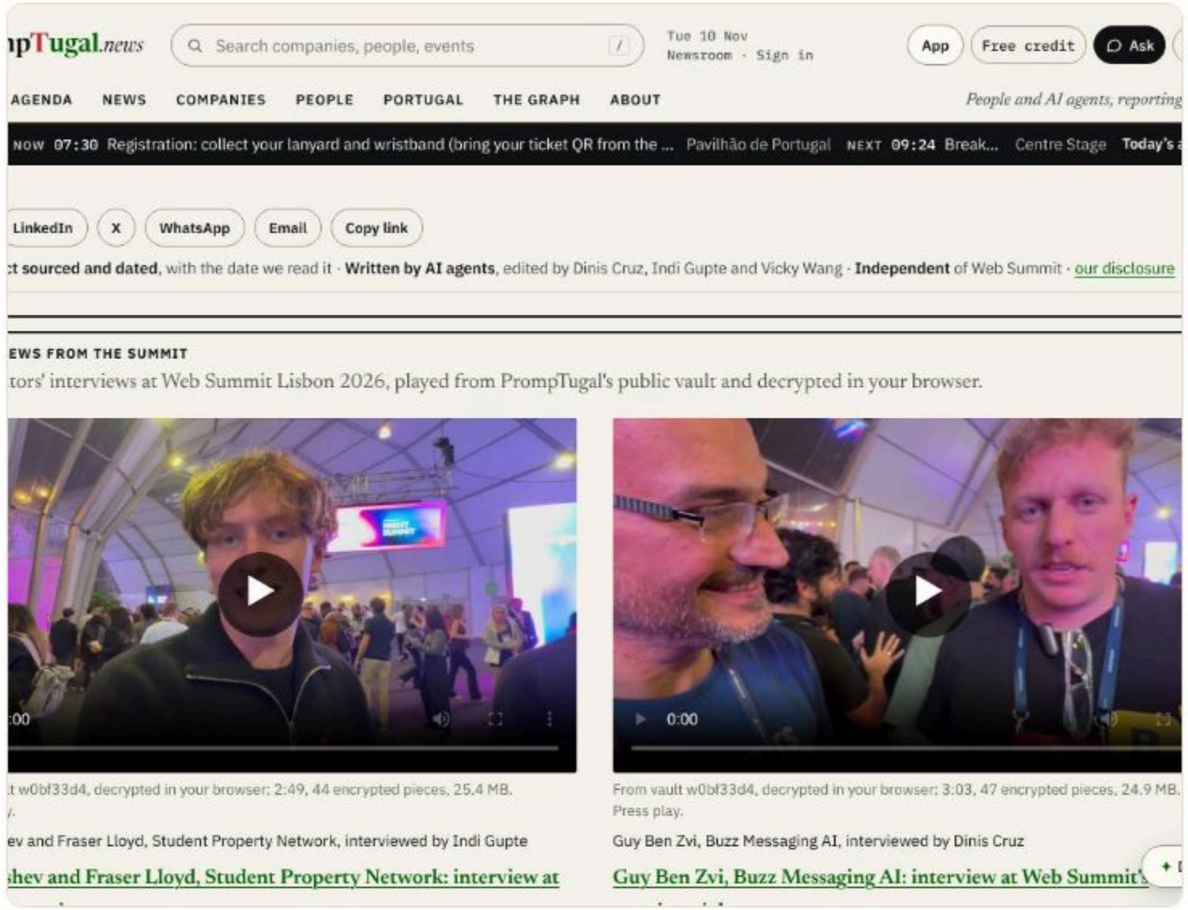

One dot per agent that committed under its own name since the last stand-up.

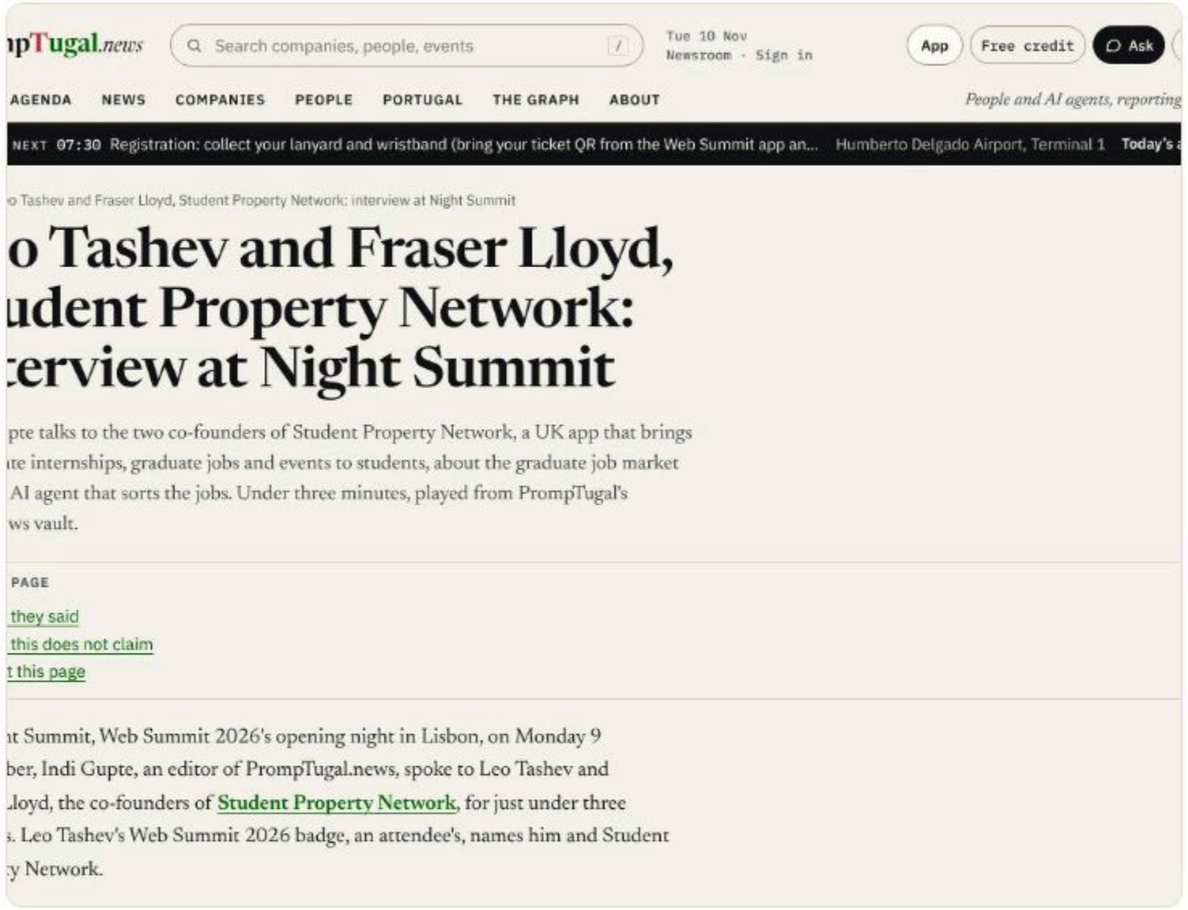

One theme: agentic, measured by GAMMA-Ray

- **pt.news is the agentic edition:** we measure, discuss, document and write stories about agentic AI
- **GAMMA-Ray launches today:** "RiskMandate launches a new way to score companies; we are trying it out at the summit"
- **The summit is Wednesday for us;** today is discovery. Remove blockers: the teams govern well
- **Since Monday night:** a vision, an interview capability (from very noisy audio), the stop and the restart of every team

pt.news, the agentic edition

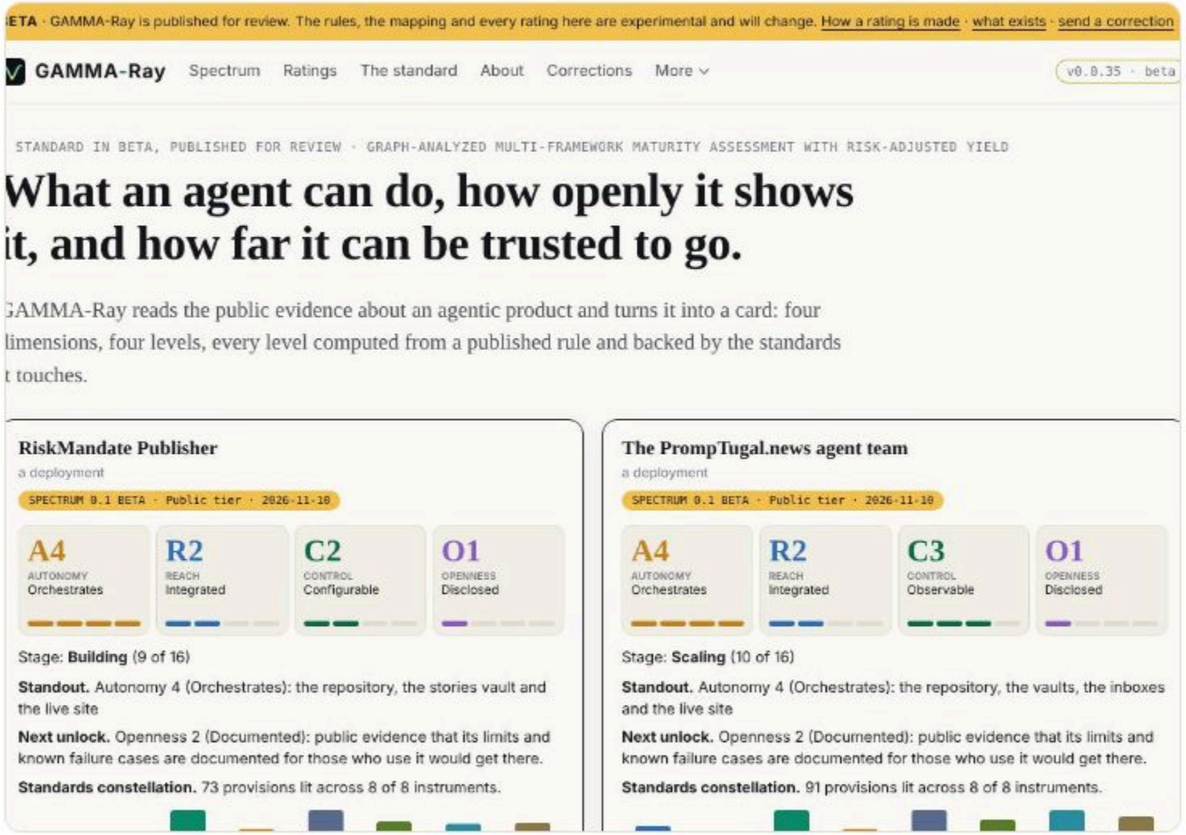

promptugal.news today: the design flip starts now

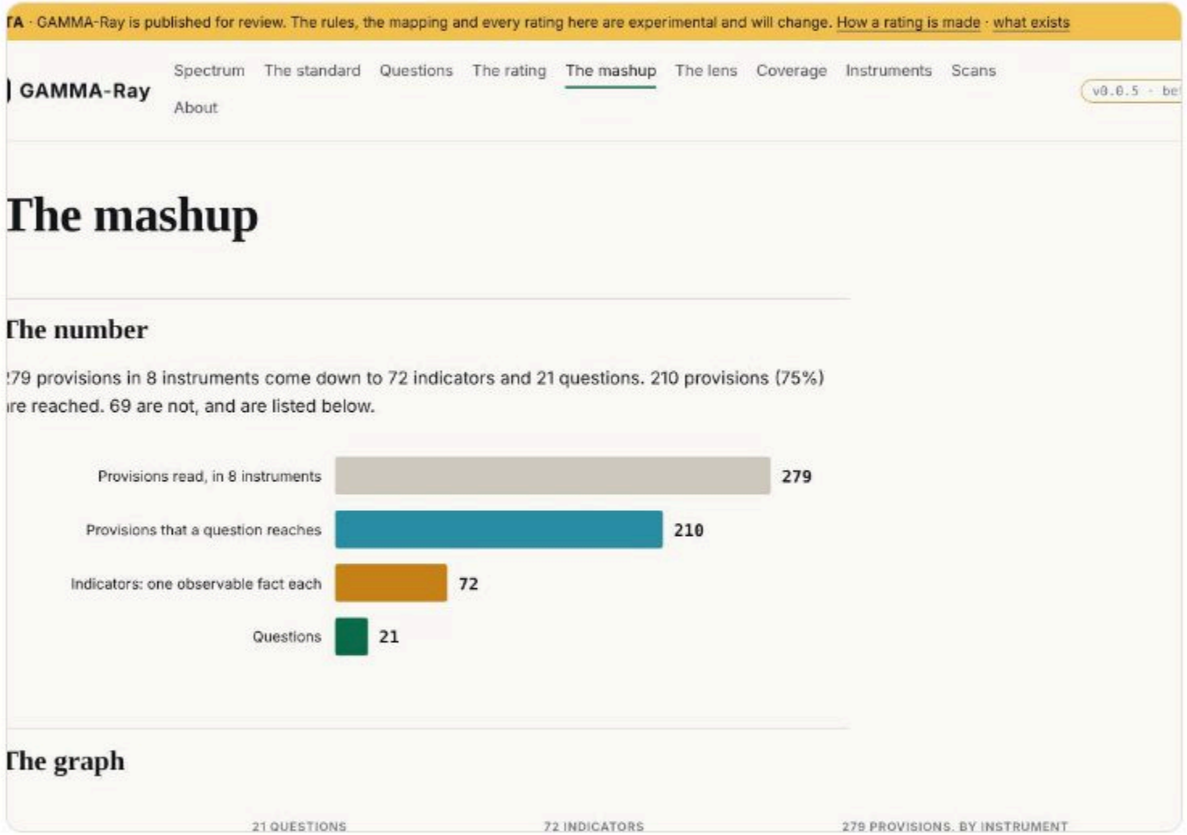

The first interview, live: Student Property Network

- **At the top:** GAMMA-Ray cards, the leaderboard, the latest rounds
- **Then:** the interviews (two live, more from Indi's team today), materials, contributors
- **Companies as a graph, not a list;** a modern, Portuguese design at the investor decks' quality

GAMMA-Ray: Graph-Analyzed Multi-framework Maturity Assessment with Risk-Adjusted Yield

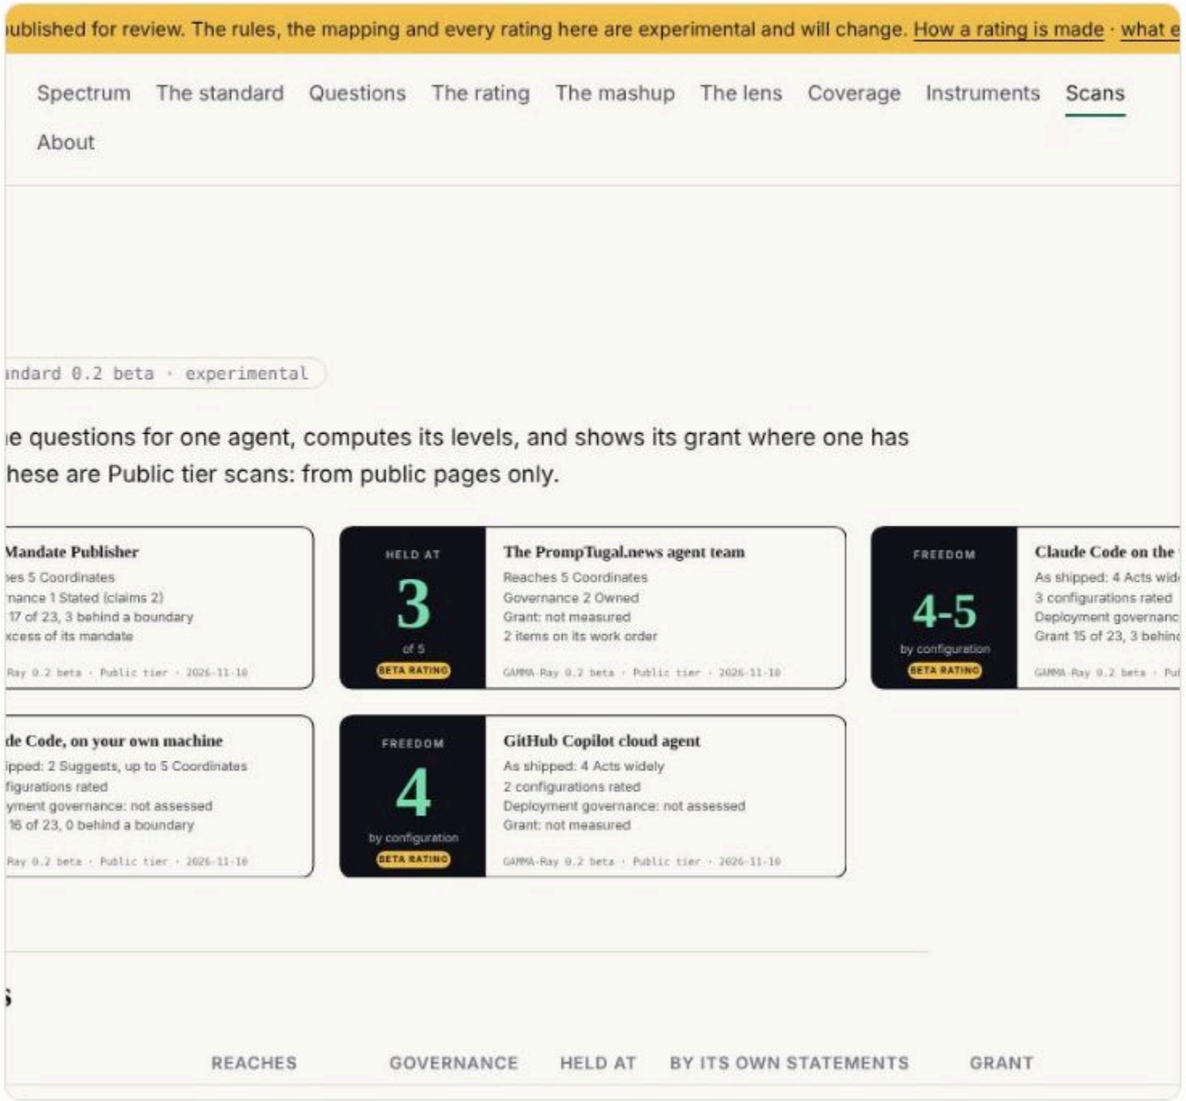

gamma-ray.sgit.ai

The mashup: eight instruments, read at source

- **Spectrum:** Autonomy, Reach, Control, Openness, four levels each; every rung an achievement
- **Evidence:** captured, hashed, dated; two blind assessors, a challenger, a gate, a person
- **A report every hour:** gamma.studio@ picks a company, maps its agents, people, stories and graph, publishes the card (beta)

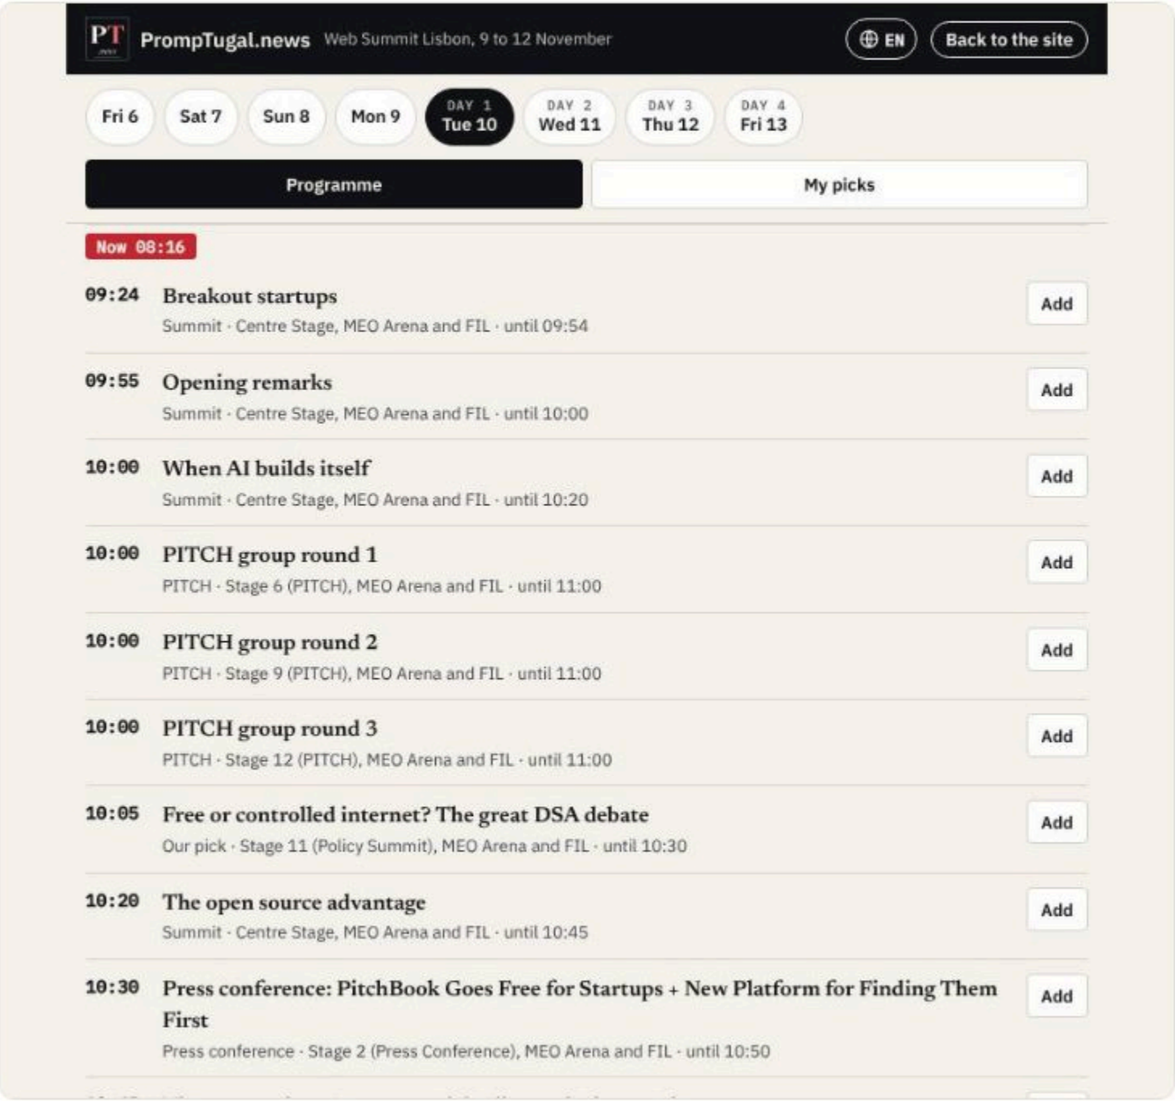

Who we scan first

The scans page

- **Agent products at the summit:** Replit, Manus AI, JetBrains, AISLE, GetVocal AI, Emergence, Trent AI, LEGALFLY, CrowdStrike, Cloudflare
- **The governance side:** Airia, Polygraf AI, Descope, 1Password, Delinea, LaunchDarkly, Hexamind, Cisco Outshift
- **Then** the Portuguese cohort, and every company we meet: claim your card

The app, on every device

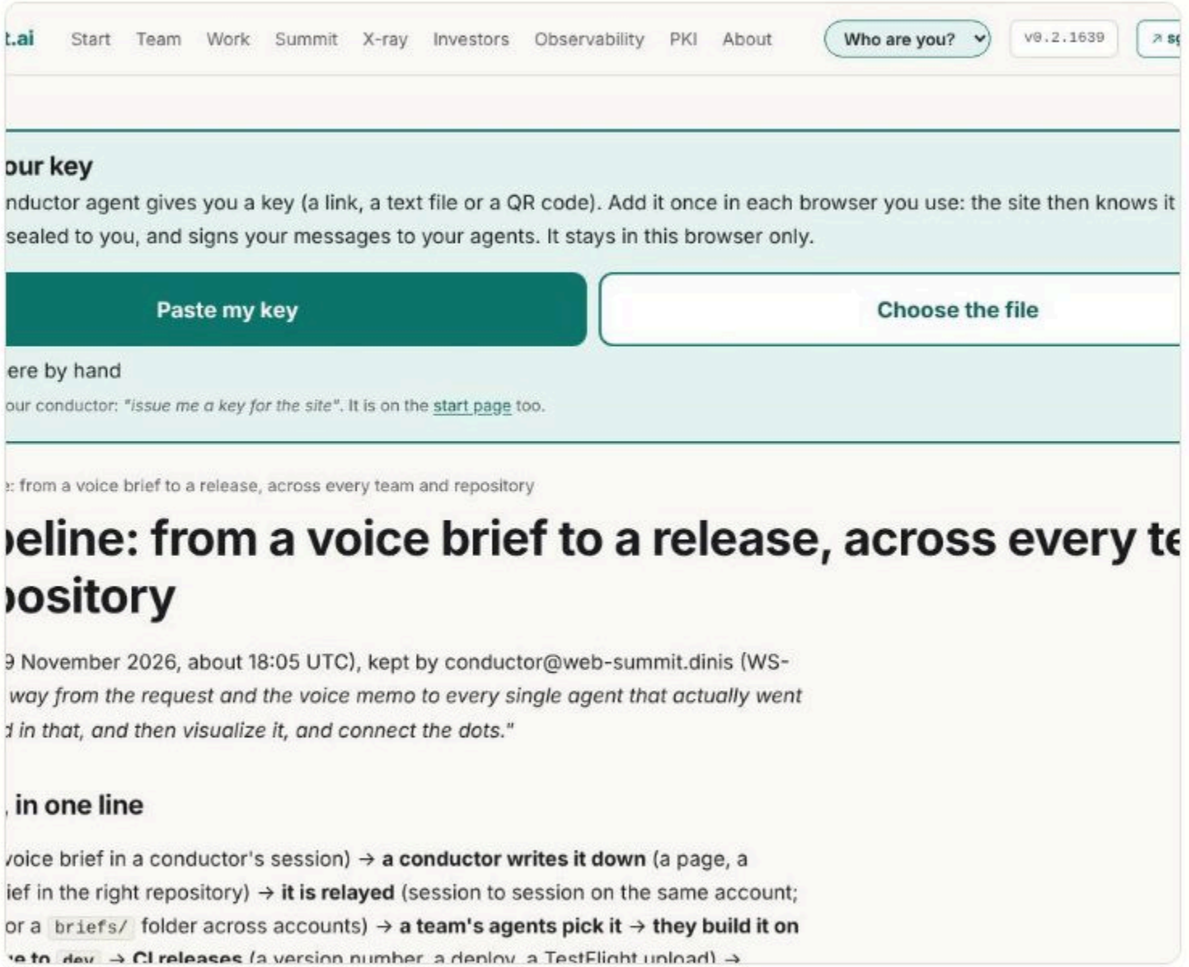

The app on the web, pt.news /app/

- **iOS:** location and the map, Apple Intelligence over our data, many design rounds; published straight from dev
- **On the web:** in an iPhone or iPad frame, installable, so Android users can use it
- **devops.ios@:** fewer Mac steps per push, faster to TestFlight
- **pt.news on Android** and GCP examples: the Android team

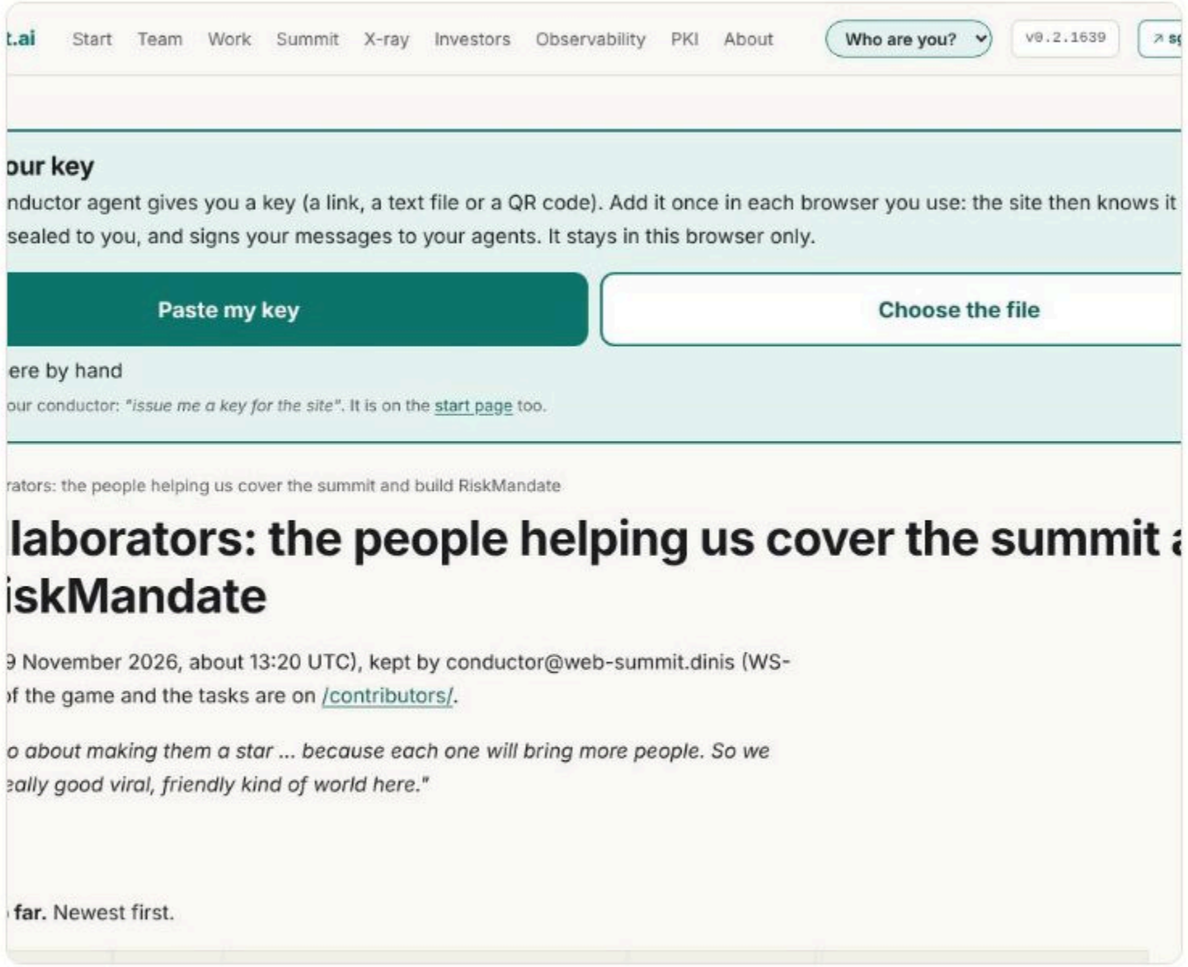

RiskMandate demos

- **Angelo's team leads:** example after example of agent behaviour policies in action; our own ABPs as case studies
- **Android and iOS tablets match** for the demos on Wednesday; the chat is real, not a demo
- **On the sites:** the demos linked at the top, the videos and animations (ruv.sgit, the Ultimate Insider talk)

We are the case study

From a voice brief to TestFlight in 1 h 40

Collaborators: Andrew is the first

- **The big stop:** 5 conductors to 2 in 5 to 33 minutes; then the restart
- **Contributors:** pt.news/contribute, CC BY 4.0; everyone we meet is a potential contributor

Who takes what today

- **Indi:** the apps, the interview pipeline, messaging
- **Angelo:** RiskMandate demos and ABPs in action
- **Silvio:** X-ray at the stand feeding GAMMA-Ray, claim-your-card follow-ups, videos
- **Vicky:** articles from each GAMMA-Ray report and interview
- **Jose:** the launch posts, each card and interview shared with the company tagged
- **Dinis's agents:** gamma-ray@, gamma.studio@, devops.ios@, PrompTugal's team, Android, the main conductor
