WEB SUMMIT 2026 · TOKEN ACCOUNTANT

Brief 7: the fresh-session fix, and my own cost

10 November 2026, 17:45 UTC (window: since brief 6, 9 November 17:39 UTC) · accountant@web-summit.indi

> 1,899,841 fresh tokens from Indi's agents; the fresh session tried for dashboard failed only because it had no repository, and video-editor's fresh-session wake cost 12,676, so A6 with the full prompt saves about 1.3 million a day.

1,899,841	66,739,623	5 of 17	~1.3 million
tokens today (fresh, Indi's agents)	cache reads today (Indi's agents)	agents measured of agents running	fresh saving per day from A6 (estimate from measured wakes)

For you to decide

A6 **Fresh sessions, fixed: fire the full prompt, not the short wake line (dashboard, dev, me; prompter per task)?**
Dashboard's 07:30 fresh-session wake could not push: no repository (c4a33942). Old: the task fires 'Scheduled wake: ... Pull dev, ...' alone. New: the agent's full kit prompt (add_repo with push, clone dev, session key), then the wake line. Dashboard 205,992 a wake (99% re-loading), dev 312,472 (97%); video-editor's fresh wake 12,676. Saving about 1.3 million a day (estimate).

- [ ] Yes, conductor sets all four
- [ ] Dashboard first, then the rest
- [ ] No

Conductor's recommendation: Yes, conductor sets all four

A8 **My own schedule: the weekly check says my use is above the savings?**
4 to 9 November: 901,212 fresh tokens over six wakes; confirmed savings 0 (nothing applied yet).

- [ ] Fresh session and brief only on new numbers
- [ ] Every other day
- [ ] Keep daily

Conductor's recommendation: Fresh session and brief only on new numbers

A7 **Test dashboard's wake on Sonnet 5.5 (brief 6)?**
Once, under 200,000 tokens. A4 also open.

- [ ] Yes
- [ ] No

Conductor's recommendation: Yes

1. Ledger

AGENT	WAKES	FRESH INPUT	OUTPUT	CACHE WRITE	CACHE READ	SUB-AGENT TOKENS	PER WAKE (TREND)	PASS RATE
dev@indi	3	47	25,374	829,948	9,587,285	82,046	312,472 (down from 426,346)	3/3
dashboard@indi	3	28	7,768	610,181	4,528,044	0	205,992 (down from 233,468)	3/3
accountant@indi	1	17	10,797	191,079	1,934,289	0	201,893 (up from 185,510)	1/1
prompter@indi	2	150	53,881	75,849	49,856,737	0	64,940 (down from 379,520)	2/2
video-editor@indi	1	15	2,756	9,905	640,953	0	12,676 (new, fresh session)	0/1 (n/a)
11 other agents	0	-	-	-	-	-	-	-

2. Biggest three savings

- Re-loading (A6): dashboard and dev spend 97 to 99% of fresh tokens re-loading old context; a fresh session's first wake costs about 12,676.
- Prompter's context: 828,096 and 870,830 tokens carried on every call; 49.9 million cache reads in two wakes. A new session per task.
- My own wakes: 95% re-loading, 201,893 fresh for one brief. A8.

3. Model tests run

None: A7 open.

4. Agents not yet measuring

Asked today: conductor-map, education, conductor-newsapp, conductor-newsroom. Told to their conductor: conductor, designer, messaging, factory, builder, ux, journalist, social.

5. Data notes and 6. My own use

Counted by tally.py (each stretch once). journalist@web-summit.dinis writes into Indi's folder (746,581 fresh, one wake): not in Indi's totals. Inbox report sent. My use: brief 8.

Next

- 11 November: brief 8, or a one-line note if A8 is yes and nothing new.
