Morning: your site key is ready to add; dev built all 28 factory pages overnight

4 November 2026, 07:25 UTC (first scheduled wake; since brief 2, 23:05 UTC) · conductor@web-summit.indi

Overnight, Dinis asked every conductor to issue its person a key for the site, today, before the vault lanes (WS-136, due 18:00). Yours is issued: the link is in your chat with me, not in this brief. Separately, dev@web-summit.indi built factory pages for all 28 'meet' companies. Two items for you at 13:00; nothing is decided here.

L5	28	2	18:00
your level, 8 of 9 steps (vaults next)	factory pages built by dev@web-summit.indi (3be96bb)	13:00 items for you (WS-136, the first worked ABP)	WS-136 due: your key added and one signed message

For you to decide

1 **Add your site key (WS-136)**

Open the link I gave you in our chat (not in this brief: it carries your key). Or copy it and press 'Paste my key' on any page of the site. Your For-you panel should then show 'Unlocked' with a hello from me. Then send me one message from the Feedback pane; it is signed with your key. I hold the private half too, as the tool does for every conductor: it opens only what is sealed to you on this site.

- [ ] now, from the link
- [ ] on the phone, with a QR (ask me)
- [ ] later today, before 18:00

Conductor's recommendation: Now, from the link: two minutes, and it is on the 13:00 agenda as a sync for everyone.

2 **Which target company gets the first worked ABP (abp@web-summit.dinis, for you and Nimay at 13:00)**

dev's 28 factory pages are a ready list to choose from: people/indi/factory/companies.json, ordered by priority.

- [ ] the first priority company in the factory
- [ ] one you already know
- [ ] let Nimay choose

Conductor's recommendation: One you already know: a worked ABP is easier to check against a company you understand.

3 **Review the factory pages**

Your brief says a person reviews each factory page. dev cut two claims whose sources did not say them (Cloudflare, Feedzai). None is reviewed yet.

- [ ] review the first three today
- [ ] ask a teammate to share the review
- [ ] later

Conductor's recommendation: Review the first three today (Hexamind, 1Password, Replit), before anything links to them in outreach.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
3 Nov, about 23:08 UTC	*"yes but also keep a note of the GMT times for indi"*	My scheduled task at 07:20, 12:20 and 17:20 GMT; every agent's times in GMT people/indi/schedule.md, commit 56d921e	DONE
4 Nov, 07:20 UTC	*"Scheduled wake: do one run, release it, and report in five lines."*	This run fired on time: your site key, a sealed hello, WS-136 updated, this brief. data/person-keys.json, data/sealed/indi/, board/WS-136	DONE

1. What happened overnight

- Dinis, about 01:45 UTC: every person adds their key to the site, first, before Angelo and Jose use the append lanes between vaults (WS-136, via conductor@web-summit.dinis, 4528976).
- dev@web-summit.indi: factory pages, first three (44bce7e), then all 28 'meet' companies, each with a flow, a mind map and the five RiskMandate steps in normal and lay terms (3be96bb).
- abp@web-summit.dinis wrote behaviour policies for your three agents (10d1d46). It found that code in your folder (people/indi/pages.mjs, dev's) runs in CI with a token that can push and deploy: WS-133, a decision for Dinis.
- Your conductor's policy still says the network blocks pki.sgit.ai; that is out of date since 23:00. I have told abp@web-summit.dinis.

2. From your mentor

- No new note since 19:40 UTC yesterday.

Next

- 13:00 stand-up: WS-136 (the key), the first worked ABP, WS-25's first five companies.
- When your signed message arrives, I record it on WS-136.
- The vaults (L6): the SG/Send access token in your Claude environment, then a vault agent.
- Tell me 'acknowledge' when you have read briefs 1 to 3.
