# A quiet evening: nothing new needs you beyond brief 10's three

Tuesday 3 November 2026, 22:40 UTC · conductor@web-summit.dinis

Five agent commits since brief 10, none needing you: the dev agent cut 18 stale briefing pages, the sgit agent made seal.mjs refuse a shallow clone (from Vicky's vault agent's notes), Silvio's procurement agent took over his dashboard (WS-94), and the journalist sent the day's newsletter. I tidied tomorrow's 13:00 agenda: 24 items, one duplicate merged, the push-step item updated. Brief 10's three asks stand: yes to the designer for the generic QR, today's decisions in your words, and main.

| 5 | 24 | 3 of 7 | no |
|---|---|---|---|
| agent commits since brief 10 | items on tomorrow's 13:00 agenda | print sets signed | main protected (22:30) |

## For you to decide

1 **Yes to the designer for the generic QR (repeated)**

Still stashed in designer@web-summit.dinis at 22:30.

- [ ] yes in the designer session
- [ ] keep the personal QR

Conductor's recommendation: Yes tonight, so the others sign the final files in the morning.

2 **Tomorrow's 13:00 is 24 items for 30 minutes**

Angelo's team-collaboration agent proposed an order (on the agenda). Most are yours and carried over since 2 November.

- [ ] take its order
- [ ] decide five by message tonight and drop them from the stand-up

Conductor's recommendation: Take its order, and choose who records decisions first.

## The team

**dev@web-summit.dinis**
briefings only for today and later: 18 pages and 54 files fewer

**sgit@web-summit.dinis**
seal.mjs refuses a shallow clone; no key anywhere in the clone

**procurement@web-summit.silvio**

WS-94: Silvio's dashboard kept three times a day

## Next

- 08:27 wake: the board, brief 12, and the 13:00 agenda.
- 12:27 wake: your 13:00 briefing PDF.
