2. Biggest three savings

- Dashboard re-loading (A6): 693,880 of 698,303 fresh tokens were cache writes; context per call 301,017 and 313,192.
- Overnight rounds (A9): no run last night; 100.5 million cache reads the night before.
- My own wakes (A8): 97% re-loading, 233,409 fresh.

3. Model tests run

None: A7 open.

4. Agents not yet measuring

Told to their conductor: conductor@web-summit.indi made 14 commits today and has never written a line; dev (1) and social (1) also ran without one.

5. Data notes and 6. My own use

tally.py. My wake 8 line is stamped 17:44 by its machine's clock, before brief 8's 17:48 stamp, so it is in this window. Inbox report sent. This wake: brief 10.
