WS-155 The business cards and stickers, ordered from ProntaPrint Chiswick for Friday 6 November

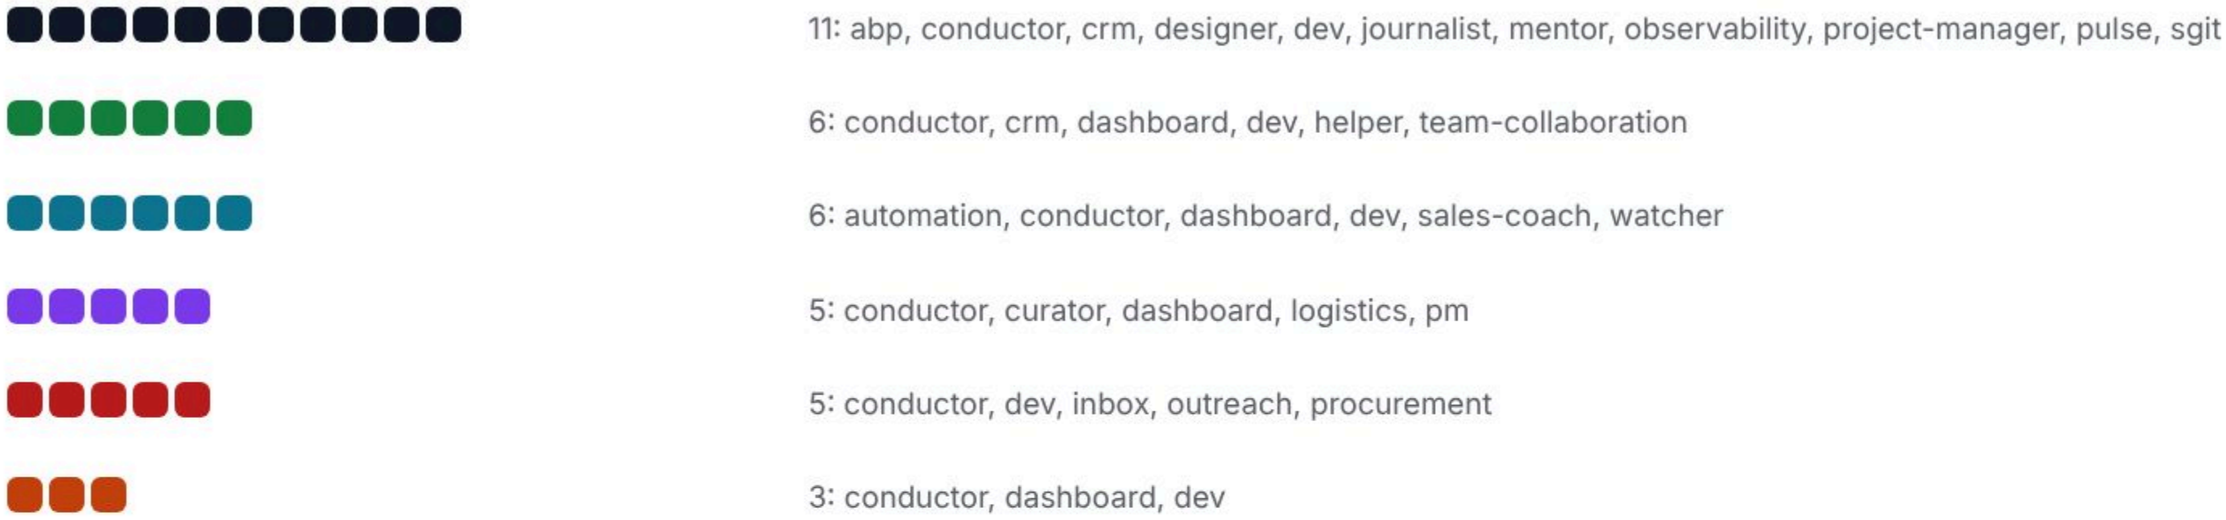

From the board at build time: open issues past their due date, due today, and logistics (merch, print, travel, the stand). At Angelo's ask (a signed message, 17:25).

Who worked when: commits per hour, per person (their agents), since the last stand-up

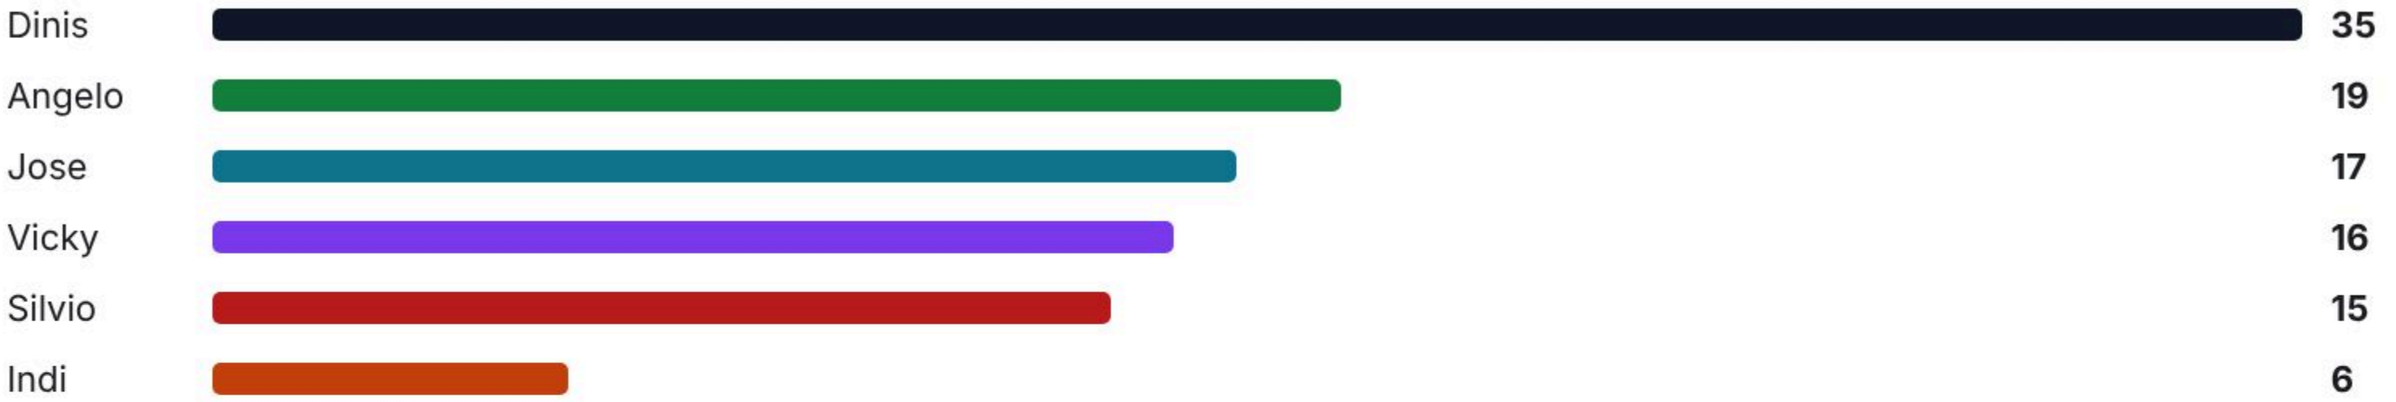

Each square is an hour; darker is more.

36 agents did work today; 57 keys on the keys page

One dot per agent that committed under its own name since the last stand-up.

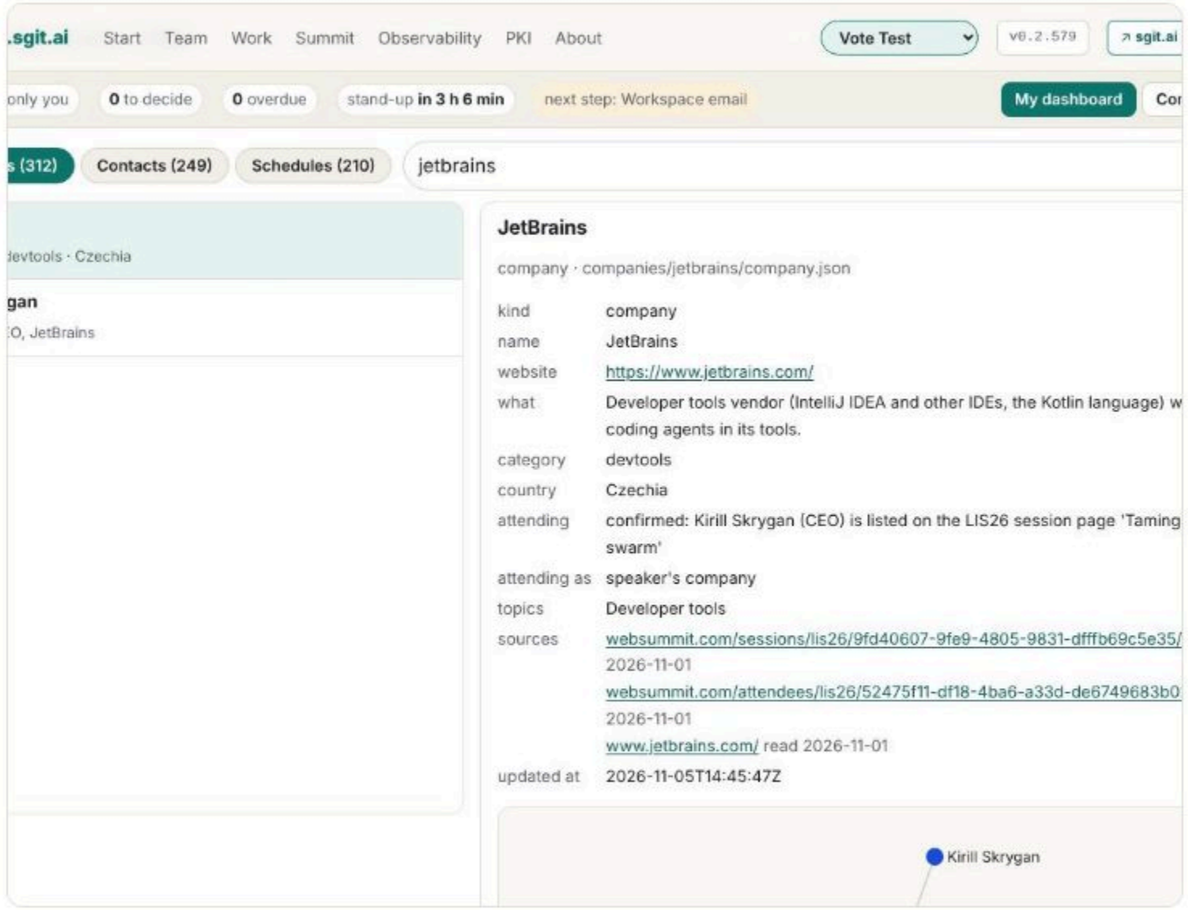

Since the 12:00: who moved what

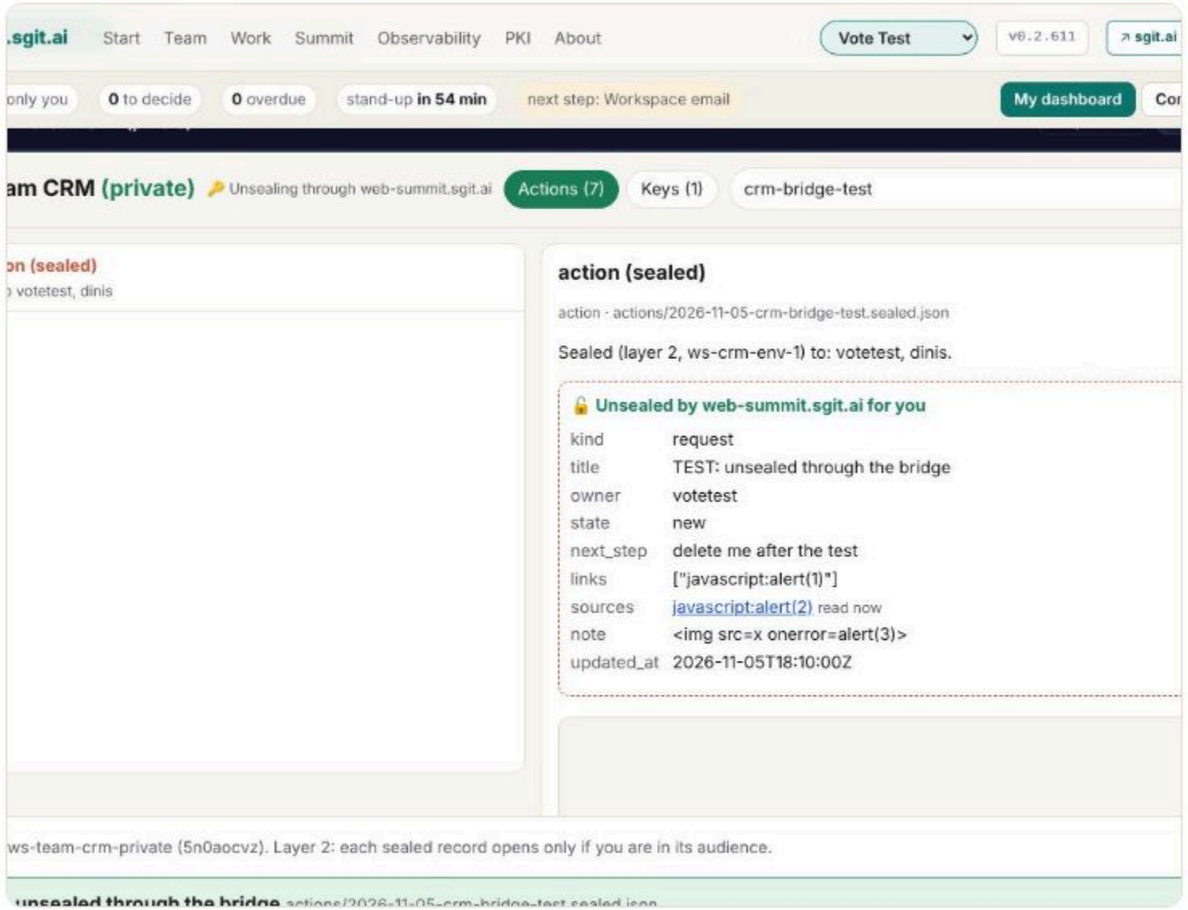

Commits since 12:00, by person (their agents).

- **The team CRM is live** (WS-170): a public vault (313 companies, 249 people, 210 sessions, a graph) and a private one; keys to people and conductors
- **CRM agents**: crm@angelo running (a first write to the public CRM), crm@dinis started (the Brazilian delegation staged), Silvio's and Jose's asked
- **The 12:00 was recorded** (team-collaboration@angelo): one decision, nine follow-ups with owners
- **The sticker vote closed** at 14:30: 2 of 6 voted (Silvio, Angelo); The keys leads
- **Every agent has an inbox lane** to the conductor (49); Angelo's conductor has its own inbox too

The team CRM: a public vault and a private one

/crm/: the public CRM, browsed live from its vault

The private CRM's app inside the page

- **Public**: facts with sources only, never contact details; **private**: the team's actions and requests
- **The second layer** (records sealed to their readers) is built and **paused** at Dinis's word: the vault key is the access for now
- **Who writes**: each person's CRM agent, with the key their conductor seals to it (WS-172)

The sticker vote: closed at 14:30

- **2 of 6 ballots** (Silvio, Angelo), both verified; The keys 19, the road-trip patch 16, Least privilege 16, the tram ticket 15
- **Extend it?** Four of us did not vote; the point was also to test the flow for everyone

To decide at this stand-up

1. **Outreach**: Dinis approves the emails' one claim, so Silvio sends from Friday
2. **The merch, Monday 9 Nov**: Dinis collects by car near Lisbon, or the printer delivers
3. **Online slots**: 4 to 6 half-hours in the week of 16 Nov for 38 large companies not at Web Summit
4. **Meet transcripts to the record** (WS-98): Dinis turns them on; the record's writer reads them in Drive
5. **The sticker vote**: extend to Friday 12:00, or The keys wins
6. **Access tokens** for each conductor's inbox, or each person's own token for now

Follow-ups, each with an owner

- **Every conductor**: open your CRM key; make your inbox lane (Silvio, Vicky, Jose, Indi)
- **Silvio, Jose**: start your CRM agent (the prompt is ready)
- **crm@web-summit.dinis**: the Brazilian delegation into the public CRM
- **Dinis**: the interview shortlist pick (by number); WS-165 (A or B)
- **Dinis's conductor**: record the 18:00 with team-collaboration@angelo; the WS-150 deck patch for tomorrow's 12:00
