WEB SUMMIT 2026 · INDI'S CONDUCTOR BRIEF

Midday: your key unlocks the vote, which closes at 14:30

5 November 2026, 12:25 UTC (scheduled wake; since brief 9, 07:25 UTC) · conductor@web-summit.indi

> Your site key is still not added. It is the one thing blocking your sticker vote, which closes at 14:30, and the vote is now issue WS-167 (my brief 9 called it WS-159). Dinis has not yet said which newsroom desks your agents run. Nothing is decided here.

2h 05m
left to vote: it closes at 14:30 UTC

19 h
since your key (WS-136) was due at 18:00 on 4 November

7
issue drafts from your agents waiting for your review (your mentor, 08:41)

0
newsroom desks of yours started; the split is still Dinis's to say

For you to decide

1 **Add your site key, then vote (WS-136, WS-167, closes 14:30)**
Use the link or the QR I sent on 4 November. It works on your laptop and on each phone or iPad (WS-166 asks for that by Monday). Then open https://web-summit.sgit.ai/stickers/vote/ in the same browser, rank your top picks and press Submit. If you cannot find the link, say so and I will send it again here.

- [ ] now
- [ ] send me the link again
- [ ] skip the vote

Conductor's recommendation: Now: it is quick, and the vote closes in about two hours.

2 **Review your agents' overnight drafts, starting with the message (WS-15)**
Your mentor suggests an hour with the seven drafts while you are in person today. Your dashboard lists each one with its issue: WS-15 (the message), WS-19 (the card loop), WS-22, WS-26, WS-27, WS-59, WS-125. The message is the first to agree with Nimay.

- [ ] start with WS-15
- [ ] start with WS-27 (company pages)
- [ ] later today

Conductor's recommendation: Start with WS-15: Thursday's outreach depends on it.

3 **Tell me 'acknowledge' for briefs 1 to 10**
I have never recorded that you have read a brief, so every one starts from the beginning. One word fixes it, and the to-do list asks for it (WS-112).

- [ ] acknowledge
- [ ] not yet

Conductor's recommendation: Acknowledge once you have skimmed this one.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
5 Nov, 07:25 UTC	*“(my brief 9 question) Which newsroom desks, if any, should your agents start now that you can push?”*	Waiting for your answer. Dinis's 18:00 sync, as Jose's conductor captured it, names Vicky for the researcher and newsroom@web-summit.dinis for the correspondent. It names no desk for you. data/meetings/2026-11-04-1800/	WAITING

1. What happened since brief 9

- Dinis's conductor renumbered the sticker vote from WS-159 to WS-167 (72490583). The vote page is unchanged.
- Angelo asked Dinis's conductor to drain the sticker votes (28c6f32), so you are not needed for the drain unless you want to be.
- The midday stand-up now starts at 12:00 from today, by the team's vote (c44d8c5).
- Vicky's desks are unblocked in the newsroom, and her curator flagged the newsroom's gate: it now needs derived data outside its own folder (5d2f0c9). That is Vicky's and Dinis's agent's fix, and it asks nothing of you.
- Your dashboard agent built your to-do list at 07:30 (people/indi/todo/todo.json). The newsroom is at v0.1.14.

2. From your mentor (08:41)

- Spend an hour on the seven drafts, then add your key. Your mentor hands over tomorrow at 08:41 if your agents keep running on their own.

Next

- 14:30: the sticker vote closes.
- 17:20: my next wake.
- Until you say which desks to start, I start none.
