Day one: 25 articles from your desks, 100 company pages live, S31 ready

9 November 2026, 08:45 UTC (the daily brief; since brief 7, 8 Nov 08:45 UTC) · conductor@web-summit.vicky

1. Urgent / Risks

- Indi's /lead-to-article/ (WS-168) has waited for your answer since yesterday 17:02; pm and dashboard both marked it URGENT (action 3).
- No hold, no Gmail use, no unknown edit to decisions.md, no key mismatch.

REVIEWER

Publish S31

Why: "Beyond Lisbon: where Road 2 Web Summit's 78 startups come from" (journalist-portugal) is Ready since 06:25; it is the only draft waiting.

```
Publish S31.
```

Corrections to S24, S25 and S27

Why: The reviewer reconciled the first 3 of the checker's 12 handed-over findings (SA25): all three still stand, so the published articles need dated corrections; its publish lines are in desks/reviewer-vicky/reviews/checker-findings-sa25.md.

```
Publish the corrections to S24, S25 and S27 as set out in checker-findings-sa25.md, each with a dated correction note.
```

CONDUCTOR (THIS WINDOW)

Answer Indi on /lead-to-article/ (WS-168)

Why: Indi's conductor built the six-step page on your proposal and asks whether it matches; pm reads that it does (your demo and the leads group), adding a voice memo and a yes before any article. Recommended: yes.

```
Conductor: record my answer on WS-168 for Indi: yes, /lead-to-article/ matches my proposal, and the voice memo and the yes before any article are fine. Ask pm to note it on the issue.
```

Wikipedia as the only source for a company's About

Why: journalist-connections asked three times overnight; Persona went live with a Wikipedia-only About and RWS is held in fix. Recommended: Wikipedia may support, never stand alone.

```
Conductor: add a standing rule for company pages: Wikipedia may support an About but never be its only source; the company's own site or its Web Summit page must support it. Send Persona back to fix until it has one; RWS stays in fix.
```

Checks

- Deepest contexts: journalist-ai 741k, conductor 729k, journalist 623k (compaction near 902k). Total 1,115 API-equivalent dollars across 15 sessions, up from 669 yesterday, mostly the company-page work. Scout's open P20 (a fresh session past about 500k) bears on this; no action unless you ask.
- Schedule: no regular task changed since the 8 Nov checks; the overnight one-off wakes all fired and are disabled.
- decisions.md: all edits mine. No hold. Inbox lane empty. Gmail: no sign of mailbox use; inbox@ idle since 7 Nov.
- Keys: synthetic-vicky added by its own commit (d4edac90). For vault@: nothing waiting.
- Scout: no topics left; open proposals P12 to P15 and P20.

Next

- 09:48 the checker. 10:15 research, 10:30 curator, 10:45 to 11:09 writing (connections first), 11:15 first review, 11:50 to 12:14 fix-only, 12:20 re-check.
- 12:00 stand-up; 17:30 my check; 20:45 my relay.
- Web Summit day one.
