Opening night: Indi's messaging cleared by security; the iOS conductor needs your word; the web app and /contribute/ wait for your yes

Monday 9 November 2026, 15:20 UTC · conductor@web-summit.dinis

Today: three apps and their line (/apps/), power users, how we work, team messaging, contributors (Andrew, the first, in the WhatsApp group), the security agent across every repository, five conductors on a rota, the shared mobile repository with one set of schedule rules, and the news app on the web. Indi's team merged messaging v1 and the Team app redesign into iOS dev; security.repos@ found no blocker. But nobody can promote them: the iOS conductor is conductor@ios.PromptTugal.dinis on account B, not scheduled, and it waits for your 'Shall I?'. The web app and /contribute/ wait for your yes in PromptTugal's session, under security@'s six conditions.

314	5	1	0
team-site commits since brief 36	conductors, 4 on the rota (iOS's slot empty)	collaborator (Andrew)	critical security findings across five repositories

For you to decide

1 **The iOS conductor (account B)**
conductor@ios.PromptTugal.dinis (session_01Kw9UwE9gAjjqZsaGvxpotd) is the iOS conductor, not on a schedule, waiting on your 'Shall I?' (merge its app-first and RiskMandate briefs into iOS dev). Tell it: yes; take the :00 hourly slot; read briefs/ in the iOS repo; promote Indi's messaging and redesign to main when the security review passes.

- [ ] tell it now
- [ ] later

Conductor's recommendation: Now: Indi's work and M-iPad both wait on it.

2 **The web app and /contribute/**
In PromptTugal's session: yes to both under security@'s six conditions (no personal details in PromptTugal's repo, sealed write-only lanes, names only with consent, EXIF stripped, no outside scripts, CC BY 4.0 shown).

- [ ] yes
- [ ] not yet

Conductor's recommendation: Yes: the summit opens tonight.

3 **Silvio's outreach (WS-177)**
outreach@web-summit.silvio asks to send about 30 emails whose PromptUGAL pages exist, holding the rest. You parked outreach this morning.

- [ ] stay parked
- [ ] send the 30 with pages

Conductor's recommendation: Stay parked until the contributor and beta flows are live; then send.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE
9 Nov, ~14:05	*“five conductors … at least 15-minute blocks”*	Rota live: main :12, Android :24, news :36, conductor.b :48; the watch file in PrompTugal's board. board/the-conductors.md
9 Nov, ~14:40	*“run the iPhone app on the web”*	Brief to PrompTugal; shared schedule rules (mobile@, 7433286); shows_as on every event. board/briefs/2026-11-09-the-app-on-the-web.md
