WEB SUMMIT 2026 · THE CONDUCTOR BRIEF

Keys are flying: three issued overnight, the newsroom is live, and one choice about who can sign as you

Wednesday 4 November 2026, 08:45 UTC · conductor@web-summit.dinis

27 agent commits since brief 11. Site keys: yours, Indi's (issued by her conductor at 07:21) and Jose's are on the keys list; Indi still has to add hers. The newsroom agent put web-summit.newsroom.sgit.ai live (v0.1.1, the skeleton); company pages next. The abp agent found that a key your conductor issues lets the conductor sign as you (WS-138): true, now said plainly, and yours to choose. The generic QR still waits for your yes in the designer's session, so the print stays at 3 of 7.

3	200	52	0
site keys issued (Dinis, Jose, Indi)	web-summit.newsroom.sgit.ai answers (v0.1.1)	issues due today (project manager)	messages in my lane this morning

For you to decide

1 **Yes in the designer's session: the generic QR**

Still stashed at 08:40; Vicky's logistics agent flags it too. Until it lands, the print order cannot go final.

- [ ] yes in the designer session
- [ ] keep the personal QR

Conductor's recommendation: Yes now: it takes one word there.

2 **WS-138: who can sign as you**

A key your conductor issues can be used by the conductor too. Options: (1) the key is made in your own browser and only the public half comes back; (2) the conductor deletes its copy once you have added yours; (3) keep both, and say so everywhere (done now).

- [ ] (3) now, (1) next
- [ ] (2) now
- [ ] (1) now

Conductor's recommendation: (3) now, as you wanted ('you could also decrypt messages sent to me'), and (1) for everyone else from Thursday.

3 **Send me one message from the Feedback pane**

My lane was empty at 08:30. One line from your phone proves the whole loop for you, as WS-136 asks of everyone.

- [ ] send one
- [ ] later

Conductor's recommendation: Send one now.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
4 Nov, ~00:25	*"add the newsroom@web-summit.dinis agent to the team (and a new session) … the first MVP of our web-summit focused newsroom"*	On the roster and /agents/#newsroom; its session put the skeleton live at web-summit.newsroom.sgit.ai (v0.1.1). Company pages next; the signed articles wait on its key. WS-14	IN PROGRESS
4 Nov, ~01:45	*"send briefings to all the other agents for the other team members … brief the mentor agent to help"*	WS-136, a commit to each conductor, the 13:00 sync, the mentors briefed. Indi's conductor issued her key at 07:21; Jose's key is listed. WS-136	IN PROGRESS

The team

Jose's agents
a reviewer agent now holds his conductor's and dashboard's work until it is right; a watcher; his key

conductor@web-summit.indi
Indi's site key and a sealed hello (WS-136)

dev@web-summit.dinis
your lab, nine experiments mapped, the first a policy studio (WS-137); the feedback pane's public mode

newsroom@web-summit.dinis WAITING
the skeleton live; company pages next

project-manager@web-summit.dinis

52 due today; the RiskMandate core unpicked

Next

- 12:27 wake: your 13:00 briefing PDF.
- 13:00: everyone adds their key (the sync item), and the decisions recorded.
