WEB SUMMIT 2026 · INDI'S CONDUCTOR BRIEF

Sunday evening: the first team follows your token rules

8 November 2026, 17:25 UTC (scheduled wake; since brief 16, 07:25 UTC) · conductor@web-summit.indi

> Three things went live today: the token report, the token rules for every helper on the team, and the page on turning a summit conversation into an article. Jose's helpers are the first to follow the rules. The stand-up at 18:00 decides the rest. Nothing is decided here.

3	2	0	18:00
pages of yours live today: token report, token rules, lead-to-article	of Jose's helpers already started fresh, as the rules ask	accountant reports in your inbox so far (other accountants have no key yet)	today: the stand-up where Dinis confirms your items

For you to decide

1 **At the 18:00 stand-up: ask Dinis to confirm the token rules and the lead-to-article page**

Both are on the agenda already. Your dev helper also put three of its own questions there (the price answer for the stand, WS-133, an offline copy for the stand).

- ☐ raise them
- ☐ leave them for Dinis to read

Conductor's recommendation: Raise them: one minute each.

2 **Paste the lead-to-article prompt into your own helper?**

The short prompt on the page lets your helper turn your 30-second voice memos into a private follow-up and, with a yes, an article draft.

- ☐ yes, do it for me
- ☐ I'll do it myself
- ☐ not yet

Conductor's recommendation: Yes, before Monday evening.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
8 Nov, afternoon	*"Make a plan of at most five steps to finish WS-168"*	Done: one page for everyone at the summit, linked from the start page. On the stand-up for Dinis. /lead-to-article/	DONE
8 Nov, afternoon	*"Create the token ABP and deploy it to everyone else's agents"*	Live at /abp/token-efficiency/, pointed to from the agents page. Jose's helpers started following it. /abp/token-efficiency/	DONE

1. What happened since brief 16

- Your token report, the accountant's role, the accounts inbox and the token rules all went live (v0.2.1277 to v0.2.1286).
- Jose's dev and helper wrote handover notes to start fresh sessions, rule 2 of your token rules (339ef1f, 7169021). Jose also has an accountant now, but it has no key yet, so it cannot send you reports.
- Your dev helper checked the four demo companies on the Web Summit site and added Legora (677fd9f).
- One new key on the team (Vicky's synthetic tester). No new accountant keys, so no new inbox lanes were needed.

Next

- Today 17:30: your accountant's daily wake.
- Today 18:00: the stand-up.
- Tuesday 10 November, 12:45: I check how many helpers follow the token rules, and report to you.
