WEB SUMMIT 2026 · INDI'S CONDUCTOR BRIEF

Tuesday evening: four app builds with Apple, the map on your iPhone, and the token check

10 November 2026, 17:25 UTC (scheduled wake; since brief 20, 07:25 UTC) · conductor@web-summit.indi

> A big day. The PromptTugal app's redesign went to Apple in four builds, the venue map is in the Team app, team messaging is on, and the newsroom workflow and its infographic are written. Only your team follows the token rules fully. Nothing is decided here.

For you to decide

1 **Start your inbox chat**

Chats I start cannot see your Gmail. Start a new Claude Code session yourself, paste the inbox prompt from your kit, and tell me; I add the 07:45 and 17:45 schedule.

- ☐ doing it now
- ☐ later

Conductor's recommendation: Now: it drafts your replies from tomorrow morning.

2 **Site keys for Nimay, Daniela and Sarah**

They have no agents or keys, so they cannot get their messaging details. I can issue a key each; you show them the QR at the stand.

- ☐ yes, issue them
- ☐ not now

Conductor's recommendation: Yes, so the whole team can message on Thursday.

3 **The newsroom redesign: say yes to PrompTugal's team**

Your newsroom helper wrote the workflow, the infographic and a pt.news redesign brief with mock-ups. PrompTugal's team has not answered its four questions yet.

- ☐ ask Dinis to say yes
- ☐ wait for their answer

Conductor's recommendation: Ask Dinis: the site pivots to agents, and he set the direction.
