A correction: you are already on the roster; at 13:00 only one item is yours

3 November 2026, 12:25 UTC (scheduled wake; since brief 2, 07:20 UTC) · conductor@web-summit.jose

> Brief 2 was wrong on one point: riskmandate-jose has been on the roster since 02:38 (sgit@web-summit.dinis, commit 31f3319), and the vaults page now says conductor-jose can be sealed to. I read the agenda item, not data/team.json, and should have checked the file. So the L6 blocker is no longer the roster but your vault agent (WS-120). The 13:00 agenda also changed: 'who records' and the push item (WS-09) no longer name you. Still preparing only: nothing on the board touched.

L5	1	36	0
your level (8 of 9); next: vaults	13:00 decision still naming you (the roster)	team commits since brief 2	pulse check-ins on the team so far (08:40)

For you to decide

1 **13:00: confirm riskmandate-jose is your account (the roster item)**
Updated at 10:35 by conductor@web-summit.dinis: the account is on the roster; what is left is Dinis's confirmation. One line from you in your own words lets me close it with agenda.mjs decide (WS-107).

- ☐ 'riskmandate-jose is my account': I record it
- ☐ leave it to Dinis at the stand-up

Conductor's recommendation: Say the line: the item closes before the stand-up and nobody spends time on it.

2 **Your pulse: confirm the draft from brief 2 as your midday check-in**
The 13:00 sync 'The pulse starts today' asks everyone for people/<you>/pulse/2026-11-03-midday.md after the stand-up; the pulse agent reads at 13:10 and 19:40. Brief 2, section 6, has the draft; its 'blocking me' line about the roster is now wrong and I would drop it.

- ☐ commit it as midday, without the roster line, with your 'feeling' answer
- ☐ you edit it first

Conductor's recommendation: Send me your 'feeling' line and any edits; I commit at once.

3 **WS-39: which route (your dev agent and your mentor both wait on it)**
From people/jose/dev/WS-39-findings.md: the official WhatsApp API cannot post into the team's existing group. Routes: 3, n8n drafts to you and you forward (works today); 4, Slack, once someone with admin makes the app and channel; 1, a third-party gateway on a WhatsApp Web session (risk of a ban; the gateway sees the group).

- ☐ route 3 now, Slack next (dev's proposal)
- ☐ a gateway (route 1), with Dinis's agreement
- ☐ Slack only

Conductor's recommendation: Route 3 now and Slack next: official, no new number, and people still send.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
3 Nov, about 02:05	*“Overnight: prepare, do not decide. Until I reply, do not pick, close, move or comment on any board issue.”*	Still in force: no reply since, and nothing on the board touched by me git log	IN PROGRESS
3 Nov, about 02:05	*“Draft a split with Angelo.”*	Brief 2, section 3; waiting for your word before anything is picked or handed over brief 2	WAITING

The correction

- Brief 2 said: 'data/team.json does not list [riskmandate-jose] for you, so the sealing tool refuses them.' Wrong at the time it was written: sgit@web-summit.dinis added riskmandate-jose (write) at 02:38 (31f3319), saying Dinis settled WS-106.
- content/vaults.md now shows conductor-jose: pushed by riskmandate-jose, on the roster for jose, can be sealed to.
- What I change: before writing about a file's state, I read the file, not an item about it.

The 13:00 agenda, as it now is for you

- Your roster item: decision 1 above.
- 'Who records the decisions': merged at 10:35 into conductor@web-summit.angelo's item, now for Dinis, Angelo and Vicky (not you).
- The push item (WS-09): now for Dinis, Angelo, Nimay and Indi; you are off it. Nimay and Indi are still at Can push (L1, 3 of 9).
- Sync for everyone: the pulse starts today (decision 2).

From your mentor (08:41 note; suggestions)

- Start the vault agent from /vault-agent/ and publish a first vault (WS-120, due Wed 4 Nov): it needs SG_SEND_ACCESS_TOKEN set in your Claude environment, never in chat. That is the last step to L6.
- Two of your agents wait on a choice: the designer's command-centre direction (Mission Control, Flight Deck or Morning Brief, in people/jose/design/command-centre/), and the WS-39 route (decision 3).
- Its question, 'Is your roster item settled?', is answered by the correction above.

Your agents since brief 2

- dashboard@web-summit.jose, 07:37: the 13:00 decisions, the vault agent and the designer's pick at the top of your dashboard.
- dev@web-summit.jose, 09:34: report-draft.mjs checked against the eight real journalist reports; the test runs on every one.
- Still to do today (brief 2, section 4): WS-113 print sign-off and sizes by 16:00, WS-08 card, WS-30 company owners, WS-73 video feedback.

Next

- After 13:00: record your words on any decision you make, with agenda.mjs decide.
- When you confirm: commit your midday pulse; pick up the split's issues you agree.
- 17:20 run: brief 4 if anything is new.
