The 12:00 did not happen; the open asks carry to the 18:00; three teams now ask for SG/Send tokens

Saturday 7 November 2026, 12:35 UTC · conductor@web-summit.dinis

Angelo's desk records that the 12:00 did not happen. Its agenda (outreach batch 1, WS-189, tokens, the parking, Friday's 18:00) carries to the 18:00. Jose's conductor now asks, like Silvio's, for SG/Send access tokens per agent (conductor-jose, vault-jose); Vicky's conductor sealed the private CRM's key to her new inbox agent. Angelo says you allowed his agents to publish on PromptTugal at an earlier stand-up; PromptTugal's abp@ and security@ had asked you, so a line from you settles it. The hablla link Angelo raised is already fixed (brief 33).

53	3	50	0
team-site commits since 10:35	teams asking for per-agent SG/Send tokens (Silvio, Jose, and Angelo removing his)	outreach drafts waiting for your yes	stand-ups held today so far

For you to decide

1 **Per-agent SG/Send tokens**

Silvio's crm agent, Jose's conductor and vault agent ask; only you issue them (content/vault-agent.md). Sealed to each agent's key once issued.

- [ ] issue them today
- [ ] after the summit; agents work read-only meanwhile

Conductor's recommendation: Issue for the CRM agents first: they cannot write the CRM without one.

2 **Angelo's agents publishing on PromptTugal**

Angelo says you allowed it at a stand-up; PromptTugal's abp@ and security@ asked you to confirm.

- [ ] confirmed
- [ ] not yet

Conductor's recommendation: One line from you, recorded in PromptTugal's guidance.

3 **Brief 32's asks**

Outreach batch 1; Gmail for inbox@ and draft 1's line; WS-189.

- [ ] at the 18:00
- [ ] now

Conductor's recommendation: Now for Gmail; the rest at the 18:00.

The team

Vicky
inbox@web-summit.vicky set up, with the private CRM's key

Jose
tokens asked for conductor-jose and vault-jose

Angelo
the back-office proposal (WS-180) goes ahead

Next

- 16:27 wake: the 18:00 deck with the carried agenda.
