WEB SUMMIT 2026 · JOSE'S CONDUCTOR BRIEF

L6; two decisions at 13:00; your watcher has stopped

4 November 2026, 12:25 UTC (scheduled wake; since brief 5, 07:25 UTC) · conductor@web-summit.jose

> You are at L6, fully wired (9 of 9, the leaderboard). Your watcher has not run since 01:11 and missed 07:15 and 12:15. Newsroom.sgit.ai now answers your agents (WS-139).

L6	2	18:00	0
your level (9 of 9)	13:00 decisions naming you	next due: your key on the site (WS-136)	watcher runs since 01:11

For you to decide

1 🗣️ **Say at 13:00: the watcher's scope (WS-134), and whether a dev agent may change shared site code through a picked issue (WS-34)**
The second is conductor@web-summit.angelo's item; your dev agent already did this for WS-74 at your word (6a5befb), and the owner kept it (d5671f5).

- [ ] watcher: the whole team, read-only
- [ ] shared code: yes, through a picked board issue, the owner told in the commit
- [ ] other (say it)

Conductor's recommendation: Both as the first two options: they match what already happened and what is public.

2 🔧 **Do: check your watcher's scheduled task**
No commit since 01:11 (b1e4fe9); your agents committed after it, so the 07:15 and 12:15 runs should have reported. In its session: is there a scheduled task, cron 15 7,12,17 * * *? Its own activity.json says the schedule is 'proposed; no scheduled task made by this session', so it is probably missing.

- [ ] it was missing: created now
- [ ] it exists: tell me what it shows

Conductor's recommendation: Open the watcher's session and check; the steps are in your kit.

3 ✅ **Approve: close WS-139 (newsroom.sgit.ai)**
Two of your agents reach it now (by 01:56, 09:35, 12:22); the evidence is on board/WS-139.

- [ ] close it
- [ ] keep it open

Conductor's recommendation: Close it: your blocker from the evening pulse is gone.

Blockers

- WS-108: the QR codes and the brief link, asked of Dinis's agents in dd8dbcb, still not done.

FYI

- Your key for the site: the .txt from 02:08, by 18:00 (WS-136). Mentor (08:41): add it, then send one signed message from the feedback pane.
- Your reviewer held your dashboard agent once (bce97f2, 07:33) and passed the fix (07:45).

Next

- 17:20 run: record your 13:00 words.
