WEB SUMMIT 2026 · JOSE'S CONDUCTOR BRIEF

Your page-view lane is almost full: one word to ask Dinis for tokens

7 November 2026, 07:20 UTC (scheduled wake; since brief 13, 17:20 UTC yesterday) · conductor@web-summit.jose

> Lane 1 holds 835 of 1,000 page views. It grew by 164 between 06:07 and 07:07, so it could be full this morning. Nothing can drain it: Dinis's rule bars any agent from pushing a vault with your token, and none of your agents has a token of its own. Silvio's conductor asked Dinis for its CRM agent's token at 05:02; one word from you and I ask the same way, for me and for vault. No interview write-up came in last night.

835	+164	0	$54
page views waiting in lane 1, of 1,000 (07:21)	in the hour from 06:07 to 07:07	SG/Send tokens your agents hold	your agents' tokens yesterday, at Opus prices (accountant's estimate)

For you to decide

1 🔑 **Now: say 'ask Dinis for tokens'**

I ask Dinis, the usual way on WS-170 (Silvio's conductor did it at 05:02 for its CRM agent, as a question to Dinis for the 12:00 stand-up), for one SG/Send access token each for conductor@web-summit.jose and vault@web-summit.jose, sealed to their keys. Vault asked you for this at 17:42. Your CRM agent's token is already asked (WS-170, 6 November). If the lane fills before a token arrives, ask Dinis yourself to drain it once. What happens to page views after it is full is not confirmed: they may be lost.

- [ ] ask Dinis for tokens
- [ ] I ask Dinis myself
- [ ] not now

Conductor's recommendation: Ask Dinis for tokens, today.

2 🎙️ **Your daily interview: none came in last night**

Your Drive folder has no new file since yesterday morning. Tonight's brief carries a fresh 'today' list; yesterday's is in brief 13. Dev's WS-41 still has 2 check-ins.

- [ ] tonight
- [ ] skip

Conductor's recommendation: Tonight, 10 minutes.

3 ✅ **Still waiting: my drain task's stored text, and the schedules (A-06, seven runs)**
Say 'change your drain task' and I change its stored text to count-only. The faster schedules and their paste texts (schedules.md#paste) are overdue since yesterday 07:00.

- [ ] change your drain task
- [ ] schedules: yes as proposed
- [ ] not now

Conductor's recommendation: Both: change the drain task, and the schedules for one day.

Overnight, your agents

- vault (17:42): counted its lane, drained nothing (no token of its own); feedback-count.json refreshed; asks you for its token (ask 1).
- dashboard (17:31): WS-74's n8n flow reads the vault agent's count.
- watcher (22:15): A-06 in its seventh run; the drain fired again at 22:08 with its old text, and I counted only.
- The helper's Gmail drafts are still blocked: reconnect Gmail, or let me try them ('To' empty).

From others

- Silvio's dashboard agent (14f3f051) added 'two brains' to your command centre through the shared engine: My brain (kept in your browser only) and the Summit brain, a 3D map of public Web Summit facts. Nothing in your own app was changed.
- Silvio's conductor asked Dinis for a token for its CRM agent (05:02), the same ask as ask 1.
- Dinis's conductor's brief 30 says yesterday's 18:00 stand-up is not recorded, so your three stand-up items carry over.

The accountant: yesterday (6 November)

- From your agents' ledgers: about 92M tokens, 6.7M of them not cache reads, about $54 at Opus prices (an estimate; cache writes cost the most). The costliest: the watcher ($12.57), dev ($9.31), the CRM agent ($7.74), your conductor ($7.32).
- Its advice, unchanged and sharper: Sonnet for the watcher first (the costliest, routine, quality held in all 6 wakes), then the dashboard, automation, the helper, vault and the CRM agent; dev as a trial, watching its reviews; your conductor stays on Opus (Dinis's direction); the designer stays until it has a ledger line (none since 5 November).
- You decide, and change the model in each agent's session; nothing changes until you say.

Page views overnight (counted only)

- 18:08 268 · 20:08 303 · 22:08 361 · 00:08 534 · 02:07 554 · 04:07 576 · 05:08 657 · 06:07 663 · 07:07 827 · 07:21 835.

Next

- 12:20: the midday brief; a token ask to Dinis the moment you say so.
