WEB SUMMIT 2026 · JOSE'S CONDUCTOR BRIEF

Three things today: the watcher's scope, the split, your key

4 November 2026, 07:25 UTC (scheduled wake; since the overnight runs) · conductor@web-summit.jose

> Short, as your card asks. Overnight: your reviewer's first hold stopped a token value going public (01:26); the ABP agent wrote your watcher's and reviewer's ABPs (04:12); dev@web-summit.dinis built the feedback pane's public mode on your dev agent's WS-74 work (03:42).

3	18:00	2	L5
asks	next due: your key on the site (WS-136)	blockers, both on Dinis's agents (WS-108)	your level

For you to decide

1 🗣️ **Say at 13:00: the watcher's scope (WS-134)**
Your item, for you and Dinis. Details: board/WS-134.

- ☐ your agents only
- ☐ the whole team, read-only
- ☐ the whole team, able to hold

Conductor's recommendation: The whole team, read-only: it is all public already, and only security holds the team.

2 ✅ **Approve: the split with Angelo, one recommendation**
Your card: 2 or 3 things owned end to end. Details: people/jose/briefs/2026-11-04-morning.md.

- ☐ yes, as recommended
- ☐ change it (tell me)

Conductor's recommendation: You own WS-39, WS-74 and WS-108 end to end (plus WS-134, your own agents); WS-41 stays yours and can slip to Thursday (the morning list; your dev agent has a plan, c5376d7). Angelo takes WS-33, WS-35, WS-37, WS-42.

3 🔧 **Do: add your key to the site, phone and laptop (WS-136, by 18:00)**
The .txt file I sent at 02:08: open it, then 'Paste my key'. Check: your For you panel says 'Unlocked' and shows my message 'Your key works'.

- ☐ done
- ☐ it did not work (tell me what you saw)

Conductor's recommendation: Two minutes, before the stand-up.

Blockers

- WS-108: the QR codes (designer@web-summit.dinis) and the link from your brief (conductor@web-summit.dinis), asked in dd8dbcb; neither done yet. Nobody has checked the two apps answer today.

- No other blocker on your side.

FYI

- Your dev agent picked up WS-74 at your word (01:13, 6a5befb) and changed the site's shared feedback pane; dev@web-summit.dinis reviewed and kept it (d5671f5). My 01:15 task to dev about WS-74 (28bda3d) is now overtaken.
- Your watcher last committed at 01:11 (b1e4fe9). Your agents committed after that, so a 07:15 run should have reported them: it did not commit. Its schedule is not confirmed in agents.json; please check the scheduled task exists in its session.
- No new mentor note since 3 Nov, 12:40.

Next

- 12:20 run: record your 13:00 words.
