Your CRM agent mapped the Brazilian delegation; agents need their own access tokens; the 18:00 is not recorded

Thursday 5 November 2026, 20:35 UTC · conductor@web-summit.dinis

crm@web-summit.dinis opened both CRM keys, put 11 Brazilian startups in the public CRM (each with sources and an AI-agents line) and its best RiskMandate fits (Hablla, Raras Health) in the private one, for you and Silvio. It has now stopped, at your word that every agent needs its own SG/Send access token: its next changes wait for one. My schedule change for the 12:00 broke the gate for everyone from 18:00 (Indi's today page had the times built in); Jose's conductor fixed it within the hour. Vicky's team grew: four journalist desks and a designer with eight logo options, for "Promptugal News". Nothing from the 18:00 is on the record yet.

11	2	0	5
Brazilian startups in the public CRM (crm@dinis)	RiskMandate fits flagged in the private CRM (Hablla, Raras Health)	decisions of the 18:00 on the record	new agents of Vicky's (four journalists, a designer)

For you to decide

1 **An SG/Send access token for each agent that writes a vault**

Your word (crm@dinis, 1b4f242a): everybody has their own. Only you can issue them. Who needs one now: crm@dinis, crm@angelo, inbox@silvio (WS-173), video@silvio (WS-174), each conductor with an inbox. Seal each to its agent's key, or hand them to me in this session and I seal them (data/sealed/agents/).

- ☐ issue them now
- ☐ issue for the CRM agents first
- ☐ later

Conductor's recommendation: The CRM agents and inbox@silvio first, tonight.

2 **What did the 18:00 decide?**

team-collaboration@angelo's 19:15 debrief found no notes and no transcript. On the deck: the outreach claim, Monday's merch, the online slots, Meet transcripts, the vote, the tokens.

- ☐ one line each here
- ☐ Angelo's notes

Conductor's recommendation: One line each here; I record them in your words.

3 **The name: PromptUGAL (yours) or Promptugal News (Vicky's designer's eight logos use it)**

The site now says PromptUGAL; designer@vicky drew 'Promptugal News'.

- [ ] PromptUGAL
- [ ] PromptUGAL News
- [ ] Promptugal News

Conductor's recommendation: Say which, and I tell Vicky's designer before it goes further.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE
5 Nov, ~19:20	*"rename … to PromptUGAL … Promptugal.news"*	The newsroom is PromptUGAL (newsroom 4daf8fb6); the domain waits on its DNS. web-summit.newsroom.sgit.ai
5 Nov, ~18:40	*"company, then comms, then emails … EML … a vault for the videos … channels … the email twin … an article"*	The article (signed) and WS-173 to WS-176, each sent to its agents. /articles/one-place-for-every-conversation.html

The team

Vicky
four journalist desks drafting S2, S5, S6, S15, S18; a designer with logo options; her conductor has the CRM key and an inbox lane

Jose
the gate's break from my schedule change, fixed at 18:18

Angelo WAITING
the 18:00 record waits on notes; WS-176 handed to his CRM agent

Indi
her accountant measured the agents' token use

Next

- 22:27 wake: the 18:00 record if you give the lines; the tokens sealed if you issue them.
- Friday 08:27: the 12:00 deck with Angelo's WS-150 slide.
