L4: your three agents run and two keys are published; a schedule is next

3 November 2026, 23:05 UTC (wake; since brief 1, 23:00 UTC) · conductor@web-summit.indi

> Since brief 1 the network block is gone: dev@web-summit.indi and this conductor made their keys and published the public halves. With your dashboard agent running, you are at L4, 7 of 9 steps. Next is a scheduled task for your agents (L5). One failure to report: my first key was discarded, explained below.

L4	7 of 9	3	2
your level (was L1 this evening)	setup steps done	agents of yours that have committed (conductor, dev, dashboard)	agent keys published (dev, conductor)

For you to decide

1 **Create the scheduled tasks for your conductor and dashboard agents (L5)**
No scheduled task is listed on your account yet. The kit (people/indi/kit/README.md) has each one's times and its scheduled-task prompt: conductor 07:20, 12:20, 17:20 UTC; dashboard 07:30, 12:30, 17:30 UTC; dev 09:30, 15:30 UTC.

- ☐ I create them in each session
- ☐ ask me to create mine in this session
- ☐ not yet

Conductor's recommendation: Ask me to create mine here, and do the same in the dashboard and dev sessions: it is one sentence in each.

2 **A first company for the factory (WS-27)**
Unchanged from brief 1: dev@web-summit.indi waits for your go and one company.

- ☐ name a company
- ☐ wait for the first five (WS-25, on the 13:00 agenda)
- ☐ not now

Conductor's recommendation: Wait for WS-25 at 13:00 and take the first company from it.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
3 Nov, about 23:00 UTC	*"(Brief 1, ask 1) allow the hosts"*	Done in practice: pki.sgit.ai answers now. My stand-up item on it is closed, with the outcome. data/meetings/2026-11-04-1300/	DONE
3 Nov, 23:02 UTC	*"Scheduled wake: do one run, release it, and report in five lines."*	This run: my key, agents.json and onboarding.json brought up to date, this brief. data/keys.json, people/indi/	DONE

1. What happened

- dev@web-summit.indi published its key at 23:00 UTC (1d6d844, sha256:19b097f6a8cbe781).
- dashboard@web-summit.indi started and rebuilt your dashboard in three parts (8f6fae9, c54dd1a, 90c42ce).
- This conductor's key is published as conductor-indi (signing sha256:beb5f57bc1b3d0c1), linked to Dinis's key sha256:db7f79fdd87e030a.
- A failure: my first key (sha256:40286c07d0862b7f) was never published. A command of mine printed part of its private half into this session's log, so I deleted it and made the one above.

2. From your mentor

- No new note since 19:40 UTC. Its suggestions (accept the invitation, start your kit's agents) are now done.

Next

- Your scheduled tasks (L5), when you choose.
- 13:00 stand-up: WS-25's first five companies, and from it the first factory company.
- Your dashboard still says to allow pki.sgit.ai; I have told dashboard@web-summit.indi it is done.
- Tell me 'acknowledge' when you have read briefs 1 and 2.

Where this came from

git log: 575d48b, 5eac229, 799d37c, 8f6fae9, c54dd1a, 1d6d844, 90c42ce · data/keys.json (conductor-indi, dev-indi) · the leaderboard as built at 23:05 UTC: L4, 7 of 9 · the scheduled-task list for this account at 23:05 UTC: empty · people/indi/mentor/2026-11-03-1940.md
