WEB SUMMIT 2026 · JOSE'S CONDUCTOR BRIEF

Your answers recorded; navy on Dinis's table; the watcher now reports to me

5 November 2026, 12:25 UTC (scheduled wake; since brief 8, 07:25 UTC) · conductor@web-summit.jose

> Your eight answers to your dashboard agent ("Record them") are recorded where they belong. Your navy wish went to today's stand-up for Dinis and Silvio; orange stands until Dinis says yes. Your watcher's reports now come to me at every wake, as you asked.

your answers recorded	asks	page views drained (12:07)	watcher flag open (with security)

For you to decide

1 ✅ **Do: switch the helper to Sonnet in its own session**

Your answer 4. I recorded it in agents.json; only you can change a session's model. The accountant checks it again on Saturday 7 November from the helper's ledger.

- ☐ done
- ☐ not yet

Conductor's recommendation: Switch it before its 14:50 wake.

2 ✅ **Do: paste your site key on every device you will use before Monday (WS-136, WS-166)**

From your mentor's last note (08:41, a handover: the mentor stops here). Your key is issued; the board has no line saying it is pasted.

- ☐ done on this device
- ☐ done on all

Conductor's recommendation: Paste it now on your phone and laptop.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE
5 Nov, about 11:52	*"I'd like dark blue (navy) for my shirts and hoodie instead of orange, if it's clearly different from Nimay's royal blue and Dinis agrees; otherwise keep orange"*	Recorded with your designer's earlier note in people/jose/merch.json; an item on today's stand-up (moved to 12:00) for Dinis, with Silvio asked to check on the printer's charts that a navy is clearly different from Nimay's azul real. Orange stands until Dinis says yes. commits 1fa1d6f (designer@), f3aadb4

5 Nov, about 12:05	*“did i pasted the transcripts of any meeting?”*	No: you pasted your own notes of two meetings (the 4 November stand-up and the 18:00 sync), recorded as your captures (WS-107). data/meetings/2026-11-04-1300/

Your answers, recorded (fecb8f0, "Record them")

- 1. Your 15 site and UI issues to Angelo's and Dinis's dev agents: your position on today's item; Angelo and Dinis decide with you.
- 2. WS-154: the observability vault keys stay held until WS-156 names a custodian (on the board).
- 3. WS-74: your vault agent counts the pending answers; n8n never holds the lane's enum key (on the board, for automation@).
- 4. The helper on Sonnet (agents.json; ask 1).
- 5. The watcher may write its own ledger file only (its policy.json).
- 6. The designer runs the reviewer before every release (ccfecef).
- 7 and 8 are yours: the command centre as your first view after the stand-up; ask Indi about a named card (WS-155).

The watcher, now routed to me

- At your word (0292242): its reports are addressed to you and me; I read latest.md and activity.json at every wake (kit, ROLE.md, policy.json updated).
- High, open: three email-address rule hits in content/family-riskmandate-agent.md (f20d264, Dinis's conductor), sent to security; not yours to fix.
- Medium: dev@web-summit.silvio changed shared build code and five people's photos, yours included; listed, not judged. Your designer's case is handled.
- Its 12:15 run made no commit (nothing new, or not run: only commits are visible).

Due today for you (from the board)

- WS-37: the end-to-end test of the page views with Angelo.
- WS-41: your pulse for today: none yet in people/jose/pulse/. One line: how it felt.
- The sticker vote closes 14:30 (WS-167).

Next

- 17:20 run: record the stand-up's words on navy and on your issues; the helper's model; the watcher's 17:15 report.
