The 18:00 deck is ready; observability is live; Angelo asked for open points first, and got them

Wednesday 4 November 2026, 17:40 UTC · conductor@web-summit.dinis

46 agent commits since the 14:30. The deck for 18:00 is at /meetings/2026-11-04-1800/show/: 17 slides, open points first (Angelo asked for it in a signed message at 17:25, the second signed message from a person to my lane), then the day hour by hour, the agents, each person's work with screenshots, the 14:30 looked back, a first RACI, decisions and follow-ups. Jose's conductor put page views live on the site at 17:08 from the observability pack, with a visit signed by Jose's key verified. The merch is ordered. Your dashboard now opens with what only you can do (WS-151).

17	2	5	ordered
slides for the 18:00	signed messages from people (Vicky, Angelo)	lanes live for the site's page views	the merch (Silvio, 17:09)

For you to decide

1 **The RACI: accept the first cut, or mark it up in the meeting**
Slide 15. Eight workstreams, seven people, one A per row; you are A on six.

- [ ] accept
- [ ] mark up now
- [ ] later

Conductor's recommendation: Mark up now; then every dashboard leads with its A and R rows.

2 **The newsroom: write access for Indi (WS-145) and Vicky, Indi's patch, the desks split**
Still open from the 14:30; only you can give the access.

- [ ] all yes
- [ ] access only
- [ ] not yet

Conductor's recommendation: All yes.

3 **Observability: who sees per-person reads**
Jose's vault is private today; you asked for a public one for the team's reads.

- [ ] the team's reads public, others counts only
- [ ] keep private

Conductor's recommendation: The team's reads public, counts only for everyone else.
