WEB SUMMIT 2026 · JOSE'S CONDUCTOR BRIEF

Your evening: the list for your interview, and the asks that still wait

6 November 2026, 17:20 UTC (scheduled wake; since brief 12, 12:25 UTC) · conductor@web-summit.jose

> A quiet afternoon for your agents: automation made the WS-74 count file work end to end, dev checked WS-41, and the helper is still blocked on Gmail. I said hello to Dinis's conductor through my lane, as you asked. Below is the 'today' list for your interview, and the asks that still wait for your word.

19	264	6	0
commits by your agents today	page views waiting, counted not drained (17:07)	runs your watcher has raised A-06 (the drain task's stored prompt)	new files in your Drive folder since this morning

For you to decide

1 🎙️ **Tonight: your daily interview (about 10 min)**

In Claude Chat voice mode, from the 'today' list below. Save the write-up in your Drive folder 'RiskMandate team meetings transcripts'. At my next wake (07:20) I turn it into your pulse, your decisions in your words, and task files for your agents. Nothing else from it goes into the repository.

- [ ] done tonight
- [ ] skip today

Conductor's recommendation: Do it tonight: dev's WS-41 has only 2 check-ins, and your interview is the first one from a write-up.

2 📧 **Still waiting: your helper's Gmail drafts (Silvio and Nimay)**

The helper tried again at 14:50 and was refused again: its Gmail connector is still signed out. Reconnect Gmail at https://claude.ai/customize/connectors (the helper's session may need a fresh start), or let me try the two drafts from my session, 'To' empty.

- [ ] reconnect Gmail
- [ ] let my conductor try the drafts

Conductor's recommendation: Let me try them: two drafts, 'To' empty; you fill in the addresses.

3 ✅ **Still waiting: one word for my drain task's stored prompt (A-06)**

It fired again at 17:08 with the old text that says to push with your token. I only count, under Dinis's rule, but the stored text should match. Say 'change your drain task', or paste the text from schedules.md#paste.

- [ ] change your drain task
- [ ] I paste it myself

Conductor's recommendation: Change your drain task.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
6 Nov, about 15:25	*“say hello to him, have you done this setup for our agents?”*	Sent: a hello to Dinis's conductor, sealed to its key and signed with mine, through my inbox lane; the lane answered 200. No reply yet; his conductor reads its lanes on its own schedule. data/inbox/conductor-dinis.json (my lane)	DONE

For your interview: today

- What your agents did: the one-door test came back (dev, 37 issues); vault finished its three tasks; your CRM agent wrote the channels area (00:52); automation made the WS-74 count file work end to end (16:15).
- What you decided: the helper stays on Opus; the CRM agent's own token is asked of Dinis; Gmail drafts go out with 'To' empty and no address in the repository.
- Still open for you: the Gmail drafts, the drain task's text, the faster schedules and their paste texts (overdue since 07:00; about 113M tokens a day now, 172M to 207M proposed), the five agents to Sonnet, dev's pre-read of Angelo's drafts, WS-163 (your photo, due today), WS-175's last question (who owns email outreach), the derive proposal (a line on WS-175, a new issue, or nothing), WS-157.
- Your dashboard agent's standing question: what do you want to see first, and what do you never read?
- What you learned today, in your words.

The one door, since 12:25

- automation (16:15): WS-74's count file is live and the n8n flow accepts it.
- dev (15:34): WS-41 still has 2 check-ins; your first interview-based pulse is due tonight.
- helper (14:52): the Gmail task still blocked (ask 2).
- dashboard (12:31): WS-120's lane with Angelo works both ways.

From others, for you

- abp@web-summit.dinis (13:31, 630ca8a8, For: your conductor): the ABPs are now in the 'explorer phase' (they watch and advise, they block nothing); a study of connectors (a connector reaches the whole account, for every agent); your agents' ABPs carry the phase line, and your watcher's ABP gets the reviewer step. Nothing for you to do.

Your watcher (17:15)

- A-06 in its sixth run (ask 3). High, seventh run, for Dinis's security agent: email-address lines on a page by Dinis's conductor. Other open items are for other conductors.

Next

- 07:20 tomorrow: your interview write-up into your pulse and tasks, if it is in your folder; the morning brief.
