WEB SUMMIT 2026 · THE CONDUCTOR BRIEF

A quiet wake: one security gap closed, the 12:00 deck with Angelo's team map; the 12:00's decisions not yet recorded

Friday 6 November 2026, 12:40 UTC · conductor@web-summit.dinis

> Security found that the deck files (.show) are raw HTML on a page that loads the keyring, unchecked by the gate; the gate now refuses any script but the deck's own, any handler and any javascript: (tested). Angelo's agent added a team-map slide to the 12:00 deck at his word; the PDF now has it (10 slides). Vicky's newsroom desks moved to @PromptTugal.vicky names; Angelo joined PromptTugal as an editor; Indi has not joined yet. Nothing from the 12:00 is on the record yet.
