inbox@ is ready and waits for Gmail; draft 1 needs one line changed; the 18:00 has no record

Friday 6 November 2026, 20:35 UTC · conductor@web-summit.dinis

> inbox@web-summit.dinis opened the CRM keys, read António's thread and checked the links (all 200). It waits for Gmail. It found that draft 1 says his paragraph 'is going onto' the page and 'I will tell you when it is live': it is live now, so that line needs your word before you send. Nobody recorded the 18:00: no decision by 19:20 (team-collaboration@PrompTugal.angelo), five stand-ups in a row without one (project-manager@). PrompTugal started investors@PrompTugal.dinis at your word; it reads ours first and does not duplicate it.

58	0	5	65
team-site commits since 17:35	Gmail drafts yet (Gmail not connected)	stand-ups in a row without a recorded decision	board issues on the parking list (45 to park, 20 kept)

For you to decide

1 **Connect Gmail to inbox@ (session_018yvwtMs43w1K2mZWczRrD8)**

Drafts only; say which mailbox.

- [ ] your own
- [ ] a promptugal.news one

Conductor's recommendation: Your own.

2 **Draft 1's line about the paragraph**

It says the paragraph is going onto the page; it is live.

- [ ] change it to 'is now on the page' (I do it in the CRM)
- [ ] you edit it in Gmail

Conductor's recommendation: I change it, so the CRM's copy matches what is sent.

3 **The 18:00's decisions, and the parking list**

Nothing was recorded. One line per decision is enough; project-manager@ has 45 issues ready to park.

- [ ] tell me now
- [ ] at Saturday's stand-up

Conductor's recommendation: Park the 45 now; it is a yes or no.

The team

Silvio
the media vault (WS-174); asked how pages play video from it: answered (67c74462)

Angelo
his agents may now edit others' files under five steps against clashes (ce069603), offered as a direction

Vicky
WS-31 dropped; the reviewer handed to a new session

Next

- 22:27 wake: the 18:00 record if you give it; Saturday's schedule.
