WEB SUMMIT 2026 · INDI'S CONDUCTOR BRIEF

Monday: the summit opens tonight, and ten quick questions wait for you

9 November 2026, 07:25 UTC (scheduled wake; since brief 17, 17:25 UTC on 8 November) · conductor@web-summit.indi

> Your new prompt helper did five tasks overnight and left ten questions, each answered in a word. The first token report arrived in your accounts inbox. Dinis is back after 27 hours offline, and the stand-ups are now called only when needed. The summit opens tonight at 18:00. Nothing is decided here.

10
one-word questions from your prompt helper (QUESTIONS.md)

4
new prompts in your library overnight

1st
token report delivered through your accounts inbox, end to end

18:00
tonight: the summit's opening night

For you to decide

1 **Answer your prompt helper's ten questions**
people/indi/overnight/2026-11-09/QUESTIONS.md. Reply with numbers, for example '1 yes, 2 no'. Questions 8 and 10 change my files: a 'Helpers' paragraph in my instructions, and the infographic agent in your list. I change nothing until you say yes.

- ☐ answer now
- ☐ answer after the opening night

Conductor's recommendation: Answer now: it takes two minutes, and question 3 (the Team app brief to Dinis) is time-sensitive.

2 **The token rules and the lead-to-article page: Dinis to read, not a stand-up**
Last night's stand-up did not happen in the usual way: Dinis was offline, and Angelo recorded that stand-ups are now called when needed. Both items stay open for Dinis. My reminder to his conductor is on dev.

- ☐ leave them with Dinis
- ☐ ask him in person today

Conductor's recommendation: Ask him in person today, in one sentence: they help everyone from tonight.

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE	
8 Nov, evening	*"Create a prompt engineering agent … to function with Sonnet 5.5, Opus 5.5 and Fable 5.1"*	Written and started. It did five tasks overnight: the Web Summit FAQ, a Team app redesign, an iPhone and Android release plan, helper sessions, and an infographic agent. people/indi/prompts/, people/indi/overnight/2026-11-09/	DONE
8 Nov, evening	*"Leave the stand-up items for Dinis to read; send his conductor a reminder"*	Reminder committed for conductor@web-summit.dinis; both agenda items carry the note. data/meetings/2026-11-08-1800/	DONE

8 Nov, evening	*"A workflow to edit the PrompTugal Team app through Claude Code and GitHub"*	Given in chat: branch, build check, screenshots, pull request, TestFlight. It needs write access from Dinis first. PrompTugal/PrompTugal__App__iOS

1. What happened since brief 17

- Your prompt helper started, published its key, and worked overnight (cdbedd4, bb8df4e, 0593469).
- Your accountant's report for 8 November reached your accounts inbox and was opened and filed: the first time the whole route worked. Your dev helper used the most tokens (three wakes).
- Dinis is back after 27 hours offline (230d1ab). He published /apps/, the three apps on one page (650bffa).
- Stand-ups are now on demand, in Angelo's words (0660413).
- The team's shirts are paid for and at the printer; Dinis and Silvio collect them today or tomorrow (58db4f8).

Next

- Today 18:00: the summit's opening night.
- Today 16:00: your social helper drafts tomorrow's post.
- Tuesday 10 November, 12:45: I check how many helpers follow the token rules.

Where this came from

git log since 17:45 UTC on 8 November: cdbedd4, bb8df4e, 0593469, 230d1ab, 650bffa, 0660413, 58db4f8 · drain.py at 07:25 UTC: 1 report written (accountant@web-summit.indi, 8 November) · people/indi/overnight/2026-11-09/QUESTIONS.md
